

**LaCrosse Introduces Women's Alpha Agility for Fall 2020**  
*Athletic Shoe Agility Meets Rubber Boot Utility*

All new for Fall 2020, LaCrosse is expanding the Alpha Agility family to include two women's styles. This boot was made to move further and faster thanks to its light weight, flexibility and comfort. It begins with premium hand-laid rubber over 5mm of naturally insulating neoprene for confident waterproofing and durability. For late season hunts, optional Thinsulate™ Ultra Insulation has you covered when the temperatures drop. LaCrosse's signature adjustable gusset fits any calf size securely. This is where athletic shoe agility meets rubber boot utility.

- Hand-laid premium rubber over a 5mm neoprene core for flexible, waterproof comfort
- Moisture-wicking and quick-drying polyester jersey liner
- Multilayer rubber provides support and durability with added texture in high-wear areas
- Active Fit locks the heel in place and back gusset is adjustable for a comfortable, secure fit
- Specially formulated LXA compound gives athletic shoe-like agility and cushion for all-day use
- Kick-off heel plate allows easy hands-free removal

Outsole: Agility II – Made with our lightweight LXA compound, this outsole features optimal rebound and comfort.
