

Allegiance SilentStrike 556 100gr Hybrid is the end result of 17yrs of subsonic engineering perfection. SilentStrike Hybrid is a specially blended combination of a hybrid lead and heavy metals to achieve the right amount of density, weight, center of gravity for function, accuracy with fragmentation in tissue. SilentStrike achieves all of that in our new 100gr Hybrid. The Hybrid 100gr will function properly set up AR15s in 7'-16' platforms. Its frangible on steel which makes it perfect for LE military operations in CQB and metal enclosures. SilentStrike Hybrid will fragment in tissue at the slower subsonic velocities. No YAW and accuracy to 100M SilentStrike Hybrid the the Ultimate 556 Urban CQB round. SilentStrike is excellent for hunters. It allows the hunter to take multiply shots without giving away his position.
