Press Release

Handi-Racker.com Introduces “The Safest way to Rack Your Pistols”

Grimes, Iowa

The patented Handi-Racker was developed to safely manipulate the slide of your pistol. Handi-Racker allows the user to chamber rounds, unload your pistol, clear jams, or work on your pistol. A must for any range bag. Small, lightweight and non-marring.

Handi-Racker is a small credit card sized tool, with slots cut to engage the slide but allow the barrel to push through. It is held on the top of the muzzle end of the pistol slide. The user pushes the grip of the handgun towards a hard surface like a table or wall. When fully racked, simply release and put the Handi-Racker back into your range bag, pocket or purse. There are 2 sizes which fit most pistols. For more information or to purchase go to www.Handi-Racker.com. Dealer inquiries can also be accommodated on the site.
