

## Holosun Announces Exciting New Products at SHOT Show

**City of Industry, Ca (Jan 19, 2020)** - The 2020 SHOT Show is quickly approaching and Holosun is introducing several new products at their booth locations. The new products are available for viewing and testing at booth number 1853 on the first floor and 10572 on the second floor.

The 507C V2 and 407C V2 are big hitters with housing that does not require removal for battery changes. With 50,000 hours of life and a solar failsafe however changing the battery is a rare requirement. The sight is constructed with milled aluminum housing, making it exceptionally durable and stable.

The 507k and 407k take durability to a new level with titanium housing and IP67 certified waterproofing. This powerful unit comes with all of the high quality features found on other Holosun sights and it also incorporates a +50 MOA travel range. Overall, these are top-level sights that will impress the most experienced tactical shooters around.

The HM3XT offers a similar suite of features with compatibility for an AR or any

tactical rifle platform. They take the features found on the 507k and 407k that improve accuracy and handling for any pistol and add them to a rifle for close-quarters contact and exceptional responsiveness.

The 509T incorporates all of Holosun's best features with shake awake technology, a solar failsafe, multiple reticle system, and red reticle color. The tactical sight is lightweight and draws the eye quickly for a perfect field of vision in fast response shooting scenarios.

Lastly, the LS111 and LS112 high-performance lasers come with linear windage and elevation adjustment features and a coaxial laser mechanism. The powerful lasers have titanium housing and water-resistant design for take anywhere, outdoor use.

All of these exciting new sights and lasers are on display at SHOT Show. Visit the Holosun booth and join the team for a range session to really experience the best sights on the market.
