

# ALEON

FOR IMMEDIATE RELEASE

## **ALEON, Inc. Exhibits its Aluminum and ABS Equipment Case Collection**

*Aluminum equipment case manufacturer to exhibit Expanded line  
at the 2020 Shot Show in Las Vegas in January*

**DAVIS, CA – Jan 2020 – ALEON®, Inc.**, Northern California-based aluminum case manufacturer, will debut its expanded Equipment Case Collection of aircraft-grade aluminum equipment cases at the 2020 Shot Show January 21–24, 2020 in Las Vegas, NV.

ALEON makes state-of-the-art Aluminum and ABS Equipment cases in addition to Aluminum Luggage and Briefcases that are durable, timeless in design, affordably priced, and offer exceptional protection and security.

### ***Aluminum Cases are Lightweight, Secure, Safe, and Durable***

ALEON aluminum cases are incredibly strong, durable, and lightweight. Aluminum will not puncture or tear and offers superior security and safety. Double reinforced corners add extra protection, and integrated TSA-accepted locks keep contents secure. Furthermore, ALEON's frame closure with latching locks – opposed to a zippered case – greatly reduces the possibility of theft and the fitted rubber seal makes the case weatherproof. ALEON

aluminum cases are perfect for all applications where protection of vital instrumentation and equipment is desired, for both storage and transport.

*Aluminum cases are more affordable than you think.*

Lightweight, durable, reliable, and highly functional, ALEON manufactures all the components – except the TSA locks – in-house and gives the savings back to the consumer.

The price range for the collections is \$100 to \$900. Because all case componentry (excluding the TSA-accepted lock) is manufactured at ALEON's integrated factory, cases are not only guaranteed to be of exceptional quality but are offered at a lower price point than other aluminum cases on the market.

The Aluminum equipment case collection includes 24 pieces. The ABS collection consists of 42 pieces, and ALEON's works with customers who are looking for a *custom size*.

ALEON takes its name from the Periodic Table's symbol for aluminum, "Al," and from the word itself, which means "an unusually kind and dedicated person." The company offers high-quality cases that endure the rigors of travel and provide a positive experience for travelers and backs its product with a global 10-year limited warranty. ALEON gives back. Part of every purchase goes to the Abundant Life Foundation to bring light to Rotan. ALEON is currently available in the United States, Canada, Europe, Japan, and China.

**ABOUT ALEON, Inc.** | ALEON is the collaboration of a progressive American company based in tech-centric Northern California and a technologically advanced manufacturer in China to bring travelers a state-of-the-art line of aluminum and ABS cases that are durable, secure, timeless, affordably priced and naturally RFID-shielded to keep digital thieves from skimming personal data. Influenced by the cutting-edge tech industries that dominate the Northern California region, ALEON luggage embodies a timeless aesthetic to ensure style-savvy and seamless travel experiences. The ALEON brand was launched in mid-2016 in the United States and Canada and is sold in better specialty stores and on e-commerce sites. ALEON is currently available in Canada, Europe, Japan, and China.
