

## About Us

Halfbreed Blades Australia is 100% Australian owned and operated. From its base of operations in South Melbourne, Australia, Halfbreed Blades designs and develops highly specialized products to user specific requirements. Our mission is to bring to market pinnacle performance specialist knives and hand tools, intelligently designed without compromise in materials or manufacturing techniques.

Halfbreed Blades knives and hand tools are capable of outstanding performance in the most extreme environments. With virtually indestructible toughness in mind, we design, develop and construct every product bearing our mark to meet the needs of serious professionals. We rigorously test our products and guarantee our workmanship and quality standards are maintained at the highest level.

Steels utilized in the manufacture of Halfbreed Blades products are imported from Austria, Japan and the United States and CNC water cut before being precision machined to our exacting specifications. Our knives and tools are heat treated under a proprietary process, coatings include Cerakote, Teflon and PVD. We are specialists in vacuum press kydex sheath manufacture, polymer injection molding, G10, micarta, titanium 3D CNC machining and tool design.

At Halfbreed Blades our products and services are tailored to cater to outdoor enthusiasts, martial artists, private security personnel, emergency/rescue first responders and military/law enforcement operators. We also offer a knife and tool design, project management and manufacture service to other companies and Government agencies in addition our own branded designs.

The Halfbreed Blades name and logo are registered trademarks of Halfbreed Blades Australia Pty Ltd (ACN 167 522 536).

## Services

### Product Development

In addition to our own branded products, Halfbreed Blades also offers a product design and manufacture service for other companies and Government agencies wanting to develop their own branded knife and tool designs. Contact us [here](#) for further details.

### Collaboration & Co-brand

Another service offered at Halfbreed Blades is our collaboration and co-brand capability. Here we design and develop new products together and bring to market via joint initiative. This service is extremely popular with established brands wanting to add knives and hand tools to their existing product range and identify with the Halfbreed Blades brand in connection with their own via joint alliance. Contact us [here](#) for further details.

### Servicing & Repair

As part of Halfbreed Blades after service care programme, we offer full servicing, repair, and re-sharpening of our edged tool products. Contact us [here](#) for further details.

### Laser Engraving

A fully customizable laser engraving service is available at Halfbreed Blades. We can custom serialize, personalize or engrave your Unit insignia on any of our branded products. This service is also available to our Product Development and Collaboration Clients. Contact us [here](#) for further details.
