**McNeil Industries attends Shot Show and reveals how machined firearm components can be delivered with aerospace precision and delivered with 98% on-time delivery.**

McNeil Industries, a privately held manufacturer of machined components and bearings in Northeast Ohio, will be attending the Shot Show in Las Vegas Nevada, January 21 -24, 2020. The Shot Show is the largest and most comprehensive trade show for all professionals involved with shooting sports, hunting and law enforcement industries. It is sponsored by the National Shooting Sports Foundation (NSSF), a trade association for firearms and ammunition industry.

According to Jeff Bernthisel, Vice President of McNeil, “We have a number of customers in the munitions business, but this is our first time attending the show. And, we’re attending to promote McNeil capabilities as a precision machined component manufacturer and to meet on new projects with some of our current customers.”

As an AS9100 Rev D accredited manufacturer, McNeil Industries has the resources to machine parts with aerospace-class precision and is able to deliver them with 98% on-time delivery. Our turning, machining, grinding and honing equipment can produce components with diameters as small as 0.250” or as large as 25”. As evidenced by our aerospace and firearms customers, we can produce them to critical tolerances as tight as 0.0001”.

McNeil works with a complete range of materials including metals, plastics, super alloys and engineered polymers. We produce a wide range of barrels, guides and slides to the smallest pins and firing components. Our extensive CNC and manufacturing capabilities for 5-axis turning and 4-axis machining to milling and grinding to welding, assembly and kitting. Through its engineering staff, McNeil provides product and application design services and prototyping and high-volume production. All capabilities are AS 9100 and ISO 9001 certified and ITAR compliant.
