## **E-Tec 509 – Water Displacing Oil**

**E -Tec 509** is calcium base water displacing oil. It provides 168 hours salt spray over black oxide finish. **E-Tec 509** is an inexpensive, easy-to-control process that allows you to increase protection while eliminating the cost of painting.

Eric Olander President of EPI: “E -Tec 509 meets military specs and competes with other finishes because of higher corrosion protection, 168 hours, and low application costs.”

Black oxide/zinc phosphate finish advantages are now even more pronounced because of the higher corrosion protection.

**EPI** advanced metal finishing with **Kool Blak 225** mid temperature blackening in 2010. Today, **EPI** leads the world in the latest developments in alkaline non-cyanide copper & silver, blackening processes hot, mid and room temperature, **E- Kleen SR** cleaning technology and rust preventives. Since 1954 in New Berlin, WI **EPI** ([www.epi.com](http://www.epi.com)) has researched and developed SIMPLY SUPERIOR products that are sold all over the world.
