Solutions:

- A** - Pit-mounted bin for trailer receiving or loader charging.
- B** - Loader fed bin
- C** - DrivOn bin
- D** - Large storage bin
- E** - Small buffer bin

Common Applications:

- Self-unloading trailer floors
- Trailer receiving systems
- Rollover rail receiving bins
- Storage and metering bins
- Process buffer bins

Store it - Move it - Meter it

KEITH® can handle it!

Alternative Fuel Systems

From self unloading trailer floors to live bottom bins, KEITH provides a variety of solutions for handling difficult materials. The unique reciprocating slat design handles just about any solid bulk material. Biomass, solid waste, construction debris, or whole tires.

Handling Solutions For Difficult Materials

The *WALKING FLOOR*® system is a powerful conveying system designed and built by KEITH Mfg. Co. Hydraulically powered reciprocating slats carry the bulk load from trailer to storage bin and/or between storage locations at your facility. Systems also uniformly meter materials at the rate required by your processing equipment.
