### **SMARTMILL CHOOSES DATAPARC OF LEVIS FOR ITS NEW SITE**

04-19-21. The President of SmartMill, Mr. Jean Bérubé is pleased to announce the start of construction of their future site. As of next September, SmartMill will be established in the new Data Parc site in Lévis. This relocation will allow SmartMill to maintain its growth. Remember that in less than a year, the company has created more than 15 new jobs. By moving to its new offices, SmartMill will increase their spacing from 5,000 to 22,000 square feet. This new building will allow SmartMill to develop new product lines by integrating artificial intelligence as well as robotization. This investment will allow SmartMill to modernize its facilities and integrate new state-of-the-art equipment, in order to maintain its leadership position in the industry.

« It became essential for our company to increase our surface area in order to meet the needs of our customers and in order to ensure the sustained growth of our activities» says Mr. Bérubé.

### **ABOUT SMARTMILL**

**SmartMill** designs and develops integrated solutions to improve and optimize factory production and manufacturing processes. **SmartMill** is a team of dedicated experts committed to the success of our clients. In this regard, we encourage the development of sustainable partnerships with all our customers around the world. In order to meet the ever-increasing demand for products that meet high quality standards, we design, manufacture and install automated state-of-the-art equipment that is a customizable solution to preserve and even increase the profitability of companies. As of today, SmartMill exports more than 80% of their solutions.
