

MT2, the Leading Provider of Environmental Firing Range Lead Reclamation and Maintenance Services Exhibiting at the 2017 SHOT Show.

Arvada, Colorado December 21, 2016

MT2 is the #1 and Largest Nationwide Professional Lead Reclamation & Maintenance Contractor for BOTH Indoor & Outdoor Firing Ranges, is pleased to announce that they will be exhibiting at the 2017 SHOT Show, booth #4041.

The SHOT Show is the largest and most comprehensive trade show for all professionals involved with the shooting sports, hunting and law enforcement industries. The SHOT Show features more than 1,600 exhibitors filling booth space covering 630,000 net square feet. The show, which is a trade-only event, attracts more than 62,000 industry professionals from all 50 states and 100 countries.

"At MT2 we are passionate about protecting people and the environment from lead hazards, and helping firing range owners protect their range and maintain regulatory compliance," stated Jim Barthel, MT2 CEO. "We have been concerned to see in the news recently the negative outcomes to range owners from choosing the wrong lead reclamation contractor. At MT2, we educate and equip range owners to be proactive when it comes to effectively managing their business from a health and environmental standpoint and have never had an EPA violation. There are Best Management Practices for managing lead at firing ranges that both indoor and outdoor ranges can implement in order to protect shooters, workers, the environmental and the local community from lead hazards." stated Barthel

MT2 has developed a free guide for range owners titled: *Never Worry About Generating Hazardous Waste Again! 6 Important Facts a Firing Range Must Consider Before Hiring a Lead Reclamation & Cleanup Company.*"

This free guide includes important safety and management practices to contain, control, and eliminate lead hazards at firing ranges.

Range owners can download a copy online at: www.FiringRangeCleanupReport.com

MT2's extensive list of clients includes over 200 law enforcement agencies such as NYPD, State Departments of Corrections, and the US Military. Since 2006, MT2 has been implementing a BMP Program for lead management and maintenance that successfully reduces lead hazards at the NYPD training range where over 40,000 officers and recruits train annually. The NYPD BMP Program includes removal and recycling of lead bullets and bullet fragments; sampling, analysis and monitoring of soil and groundwater conditions; and chemically converting potential leachable lead fines remaining in range soils utilizing MT2's patented ECOBOND® lead treatment technologies so that treated soils are considered non-hazardous and can be replaced back onto range berms.

MT2 is the Nation's #1 and leading provider of environmental firing range services in the US and has served approximately 1,000 public and private firing ranges nationwide since 2000. MT2's firing range services include complete range maintenance, improvements and lead remediation services. In the past year alone, MT2 has completed firing range clean-ups for law enforcement agencies such as NYPD, Denver, Richmond, Duluth, Concord and US Border Patrol.

Over the past decade, MT2 has removed over 11,000,000 lbs. of lead from the environment and has credited over \$4,000,000 to range owners from lead recycling while working closely with them to implement firing range Best Management Practices (BMPs) to protect shooters and the environment. MT2's patented ECOBOND® lead treatment technology provides a unique solution eliminating the need to generate hazardous waste, saving money and protecting the environment.
