REVOLUTIONIZING FIREARM SAFETY™

Gun Guardian is a firearm safety development company founded by two Florida State Law Enforcement Officers. Their real world experience is the drive behind these convenient and practical safety attachments.

Trigger Shield™ is a new and revolutionary line of safety attachments by Gun Guardian. They are referred to as attachments, as opposed to devices, because they are always attached to the weapon ... even when unlocked. This means no fumbling with, or keeping track of parts.

Trigger Shield™ is a never before seen device that bridges the gap between safe and readily available. Not only does it reduce accidental discharges, Trigger Shield™ for AR style rifles and shotguns also lowers the profile of the weapon. This makes the weapon more compact allowing for easier maneuverability, transport, and leaves additional space in the gun case or safe, allowing room for more firearms.

We will be displaying our entry level AR grip in the NEXT Pavilion, third floor, **BOOTH N103**

If you are looking for a never before seen firearm accessory, please come visit us so you can see how simple and effective Trigger Shield™ is.
