

# Worried about drones entering your secure airspace?

## SOLUTION - OUR GOALS

### Our goals:

1. Discriminate between friendly drones and foes.
2. Provide an accountability mechanism for existing and future laws

- Whose drone is that?      Where is it located?      What is its heading/vector?
- What type of drone is it?      What is the pilot's declared intent?

## SOLUTION - OUR GOALS

## AEROSCOPE SOLUTIONS - PORTABLE VS STATIONARY

	Portable Unit	Stationary Unit
Deployment Time	No need	Need setup time (several days). Depends on the configurations.
Mobility	Portable	Stationary
Detection Range	Hard to be increased (5km)	Can be increased by high gain directional antenna and by multiple stationary units in multiple sites (5km to 10km)
Restriction	Restricted by battery, weather and the user etc.	All weather unattended service
Typical Scenarios	Temporary meeting, show, assembly, or somewhere with permanent demand but not suitable for a stationary unit	<ul style="list-style-type: none"> <li>✓ Airport</li> <li>✓ Airline route</li> <li>✓ Prison</li> <li>✓ Military restricted area</li> <li>✓ Government security area</li> </ul>
