

## Longthorne (Gunmakers) Ltd

English gun makers **Longthorne (Gunmakers) Ltd** established in 2006 when they commenced development of their now renowned (in the UK at least) innovative English Shotguns.

Founded by James and Elaine Stewart they make everything entirely in their factory in Northampton England from solid billets of steel and wood. They don't use forgings and they don't use outworkers and they certainly don't use imported components to make their guns so are able to control everything about how their guns are made.

What differentiates them apart from the fact that they do make everything in house is their innovation.

They very accurately machine their barrels from a single block of high specification steel instead of fabricating them from two tubes soldered together. This results in guns which are very strong, light and stable to shoot, with negligible felt recoil and muzzle flip. The company has several patents relating to their barrel technology.

Longthorne firmly believes in continuous improvement and development and if they find something which can be improved this is precisely what they do.

Their gun fits are very unique too if you order a gun from Longthorne and are able to visit the factory to take advantage of this. Once your stock is at the stage where it is 'headed up' to go onto a 'receiver' (or action as it's called in the UK), it is then shaped by hand with you present thus achieving the perfect fit.

Longthorne have a selection of in house designs and various price points, and can also create an entirely bespoke design for you, family member and in house artist Chloe is responsible for this.

This is Longthorne's first visit to The Shot Show they will be represented by their Sales Manager Alex Black who very much looks forward to meeting you, he will have with him one of the company's latest designs, a 20b

'Renaissance'.

Longthorne will be located at The (UK) Gun Trade Association stand on level 2 stands 14203+ 14304 on 22<sup>nd</sup>, 24<sup>th</sup> and 25<sup>th</sup>.

On Wednesday 23<sup>rd</sup> they will be at stand W1622 Shot Show Pop-Up preview 8.30-5.30pm
