Zistos introduces ZistosHD Encrypted Wireless with full 1080P video

The NEW ZistosHD Tactical System is a state-of-the-art encrypted wireless system that supports true 1080P HD, low latency video and can be viewed on a laptop, tablet or smart phone. This new system design utilizes interchangeable modules, which can be switched in the field, maximizing its effectiveness and suitability for use in many different tactical applications — allowing tactical teams to make safe, visual assessments of dangerous conditions and different environments.
