THE STEALTH SYSTEM

HOLSTER & MAGAZINE CARRIER

The Q-SERIES STEALTH holster and magazine carrier are the result of a lifetime of shooting experience. Developed by Gary Quesenberry, a professional Firearms Instructor, DHS Agent and Army Veteran, the STEALTH SYSTEM was designed to address important shortcomings of minimalist concealed carry holsters. After years searching for the perfect system, Gary saw the need for a design that offered flexibility and ease in use but at the same time, didn't sacrifice safety.

Unfortunately, most minimalist holsters do not meet the standard safety requirements mandated by State and Federal agencies to be approved for on or off-duty carry. Q-SERIES solved that problem when they introduced the STEALTH SYSTEM. It's the only minimalist holster on the market that incorporates all the safety features of a full-size holster and meets the approval standards for off-duty carry by the LAPD, DHS and the Federal Air Marshal Service.

Q-SERIES products are the industry standard in minimalist design and trusted by the people who spend their lives on the front lines. We provide security conscious citizens, military and law enforcement professionals with the tools they need to be secure, confident and ready.
