

Why Miss Out!

Plain old traditional ammunition is expensive! Having a high-quality freshly manufactured line of affordable ammunition that is not over 90 days old in your store can mean sales especially in the more popular calibers. Many people will buy ammo in bulk to just go and plink with because it's fun.

The profitable line of Barnaul Ammunition from Russia is now offered in the United States under its own original historic name. Privately owned, Barnaul has been the supplier of ammunition for Russia's military and elite special forces units due to its incredible tested quality.

Barnaul uses top quality bullets, primers, powder and steel cases for fast feeding and easy extraction. Available in a wide assortment of affordable popular handgun and rifle calibers makes it easy for customers to even purchase Barnaul ammunition in bulk, a good thing for profits and customer satisfaction.

Come by the MKS Supply Booth **(11349)** at SHOT and allow us to show you this affordable high-quality profit-making ammunition.

Barnaul Ammunition is exclusively marketed by MKS Supply, LLC and sold through all major distributors.
