Reintroducing New PrOlix Total Gun Care

The Original Biodegradable Non-Petroleum Based Solvent Cleans, Lubricates and Preserves

Los Angeles, CA (For Immediate Release) — International Supplies, one of the leading distributors for the outdoor and shooting sports market, is proud to announce that they will be reintroducing the original firearms total gun care product at the 2020 SHOT Show, PrOlix in new packaging. PrOlix is a biodegradable, non-petroleum based solvent that effectively cleans, lubricates and preserves firearm parts without harming the finish or gumming up. PrOlix is unique in that it uses dry lube technology so it is not affected by adverse conditions of extreme heat or cold and does not wipe off during firing.

How does it work?

PrOlix, which starts out thin upon application for more effective, thorough cleaning, penetrates the metal, seeks out the dirt, oil and grime, and floats it away. The chemical action during this process then develops the heavier dry lubricant that soaks into the pores of the metal and creates a long lasting layer of protection. This film renews itself each time the gun is used and prevents contaminants from adhering, making subsequent cleaning much easier.

Benefits:

- Cleans, lubricates and preserves your firearms
- Ensures complete surface coverage so disassembly is not required
- Biodegradable and ozone-safe
- Non-abrasive and non-acidic
- Will not remove or harm your metal or wood finishes
- Not affected by extreme hot and/or cold (-80°F to over 460°F)
- No residue or carbon buildup
- Inhibits rust and corrosion

- More -

- Will not wipe off during firing or flash burn.
- Will not become gummy or discolor.
- Improves accuracy and prevents jamming.
- Pleasant, mild citrus smell in contrast to petroleum based products

PrOlix is a must for all blued, nickel, and stainless steel finishes. It works equally well on precision guns, air guns or the sophisticated law enforcement and military arms. Its closed cup flash point above 100°F (38°C) also makes it suitable for usage in ultrasonic, spray-under-immersion, recirculating parts washers, and immersion or hand-wipe cleaning applications.

PrOlix is available in the following models: a 1 oz. bottle with controlled drip tip, 1.25 oz. bottle with spout applicator, 4 oz. bottle with pump spray, 8 oz. with pump spray, 16 oz. bottle with pro trigger sprayer, 64 oz. refill and one gallon refill. Prices range from \$4.99 to \$179.99.
