

Trojan Firearms LLC.

booth# 1761

OUR HISTORY:

Trojan Firearms developed from more than 30 years of high precision machining (CNC Graduate Machine) for the aerospace and weapons defense industries. These industries require high tolerances in every product manufactured regardless of their application. The invaluable experience and techniques gained from 3 decades of success in the aerospace and weapons defense industries has made the transition to the firearms industry a natural move. We are proud of the products we make, and the fact that they are made in the United States with the same quality and attention to detail that we are renown for. We strive to build and maintain strong relationships through customer service that is second to none.

New for 2016

TFA-15 ADJUSTABLE DROP IN TRIGGER

The TFA-15 is our introductory single stage drop in trigger assembly giving the operator a number of key features at a very affordable price.

Crisp, smooth pull with a near zero reset. Designed with both the sportsman and law enforcement agencies in mind, the TFA-15 incorporates a fully adjustable pull poundage adjustment setting along with a proprietary mounting system that can be used in any Mil-Spec AR-15 lower receiver. Come see us at booth#1761 for dealer pricing details and demo display.
