

FOR IMMEDIATE RELEASE

American Built Arms Company Launches the New MOD*X GEN III Modular Rifle System™

Glen Rock, PA (December 1, 2015) – American Built Arms Company (A*B Arms brand) is proud to introduce the latest version of their best-selling chassis for the Remington Model 700 SA; the A*B Arms MOD*X GEN III Modular Rifle System™.

The MOD*X GEN III Modular Rifle System™ is designed and engineered for military, law enforcement, and hunting enthusiasts. The A*B Arms MOD*X GEN III Modular Rifle System™ is a lightweight (3 lbs. 2 oz.), ergonomic, drop-in chassis for the Remington® 700 Short Action. It serves as a modular foundation on which tactical accessories can be added according to the operator's needs.

“Over the past year, we received excellent, constructive feedback from a variety of law enforcement, military and competitive precision shooters who gave us some really great ideas on how to enhance the existing MOD*X,” said Jason Combs, President and Founder of American Built Arms Company. “We listened to their feedback and the result is the MOD*X GEN III Modular Rifle System™.”

The MOD*X GEN III remains one of the lightest rifle chassis on the market today. Weighing in around 3 lbs. 2 ounces, the MOD*X GEN III will be available in fixed stock or side folding stock variants. If you're looking for a tactical upgrade for your existing Remington Model 700 SA, the MOD*X GEN III is your answer.

The MOD*X GEN III will be shipping in mid-January, 2016 and will be on display at SHOT Show® in the American Built Arms Company booth #8108.
