# Introducing: The Dead Foot Arms Modified Cycle System (MCS)

## Shot Show 2016 Press Release

January 2nd, 2016- Deerfield, WI

The Dead Foot Arms Modified Cycle System (MCS) is a retro fit kit that allows a standard AR-15 platform to transform into a folding stock rifle. Utilizing proprietary dual spring technology, our Modified Cycle System **eliminates bolt bounce** and reduces the overall length of a rifle with a 16 inch barrel to 26.25 inches when the stock is folded. The built in folding stock adapter provides positive retention when the stock is folded, and with a quick swing of the butt stock the adapter ensures a rock-solid lock up in the deployed position. Our system includes: a modified bolt carrier group, recoil springs, and folding stock adaptor kit. The end user can use their current butt stock or any butt stock that will attach to a standard AR-15. The Modified Cycle System attaches only to the lower receiver, allowing the use of your choice of upper receiver, currently compatible in both 5.56 and 300 BLK.

**THE DEAD FOOT ARMS MCS ALLOWS THE END USER TO MAINTAIN THEIR CURRENT ZERO AND SIGHT PICTURE, AND SUPPORTS FULL AND SEMI-AUTOMATIC FIRE WHEN THE RIFLE IS FOLDED.**

### **SYSTEM HIGHLIGHTS**

- **26 1/4 INCHES FOLDED**
- **DESIGNED FOR RIGHT HANDED FIRERS**
- **LIFETIME GUARANTEE**
- **USE ANY STOCK**
- **ELIMINATES BOLT BOUNCE**
- **ROCK SOLID LOCK UP**
- **LIGHTWEIGHT**
