

Cerus Gear is the leading gun cleaning mat manufacture on the market. While not the sexiest piece of gear on the market, a Cerus Gear ProMat is a must have piece of equipment for any gun owner.

Cerus Gear ProMats made with a durable rubber base that will hold up to harsh oils and solvents. Made in the USA, the top is a soft polyester printed with one of Cerus Gear's 200+ designs including firearm specific schematics, step by step instructional fieldstripping mats, and colorful designs and images. The dye sublimation printed surface won't wear off or fade away with hard use. The padded leak proof design protects your work surface as well as your firearm.

Maybe the best part about a Cerus Gear ProMat is that they start out at about the same cost as a pre-2020 box of 9mm ammo. They are used by world class gunsmiths and gun manufacturers as well as the brand-new gun owner. There is an option for everyone and Cerus Gear is always adding new designs.

Cerus Gear is a small company who has been in business only 3 years and prides themselves in both quality products and quality service. "We love that we can work with both the industry leaders as well as the little guys. With all our customers, we want to make sure they are satisfied with our products and their experience with our company." Said the owner, Carrie Newman when asked about what makes Cerus Gear different from everyone else.

Cerus Gear sells to both direct to consumer on their website as well as to distributors and wholesalers. Check out their entire product line on [cerusgear.com](https://cerusgear.com). If you are interested in becoming a wholesaler or in learning more about custom options for your business, contact their sales team at [sales@cerusgear.com](mailto:sales@cerusgear.com).
