Add a Concealed Carry Holster to Purses/Bags with the new Versacarry® Modular Bag Holster

Securely add a concealed carry holster to most purses, bags, or backpacks with the new Modular Bag Holster from Versacarry®. The flexibility of this holster makes it a perfect avenue to add a carry option to users' favorite purse, backpack, briefcase, or waist pack.

The premium water buffalo leather constructed holster features S3 technology that enables adjustments to fit 90% of all handguns. This gives users a wide range of carrying options when selecting this holster.

The holster is designed to use two Velcro patches to keep it secure in the bag of choice. Users will apply the supplied Velcro patches inside of the bag at the preferred spot. The holster has double-sided Velcro built in to attach to the installed patches. The two-sided Velcro attachment points keep the holster securely in place.

Additional Velcro patches are sold separately to use in multiple bags.

The MSRP is \$30.00

Versacarry Modular Bag Holster features:

- Fits most purses, bags, or backpacks
- Firmly secures with included *Easy Apply* Velcro Patches
- S3 Technology enables holster adjustment to 90% of all handguns
- Made with Premium Water Buffalo Leather
