The Evolution of Training

Our company started with a simple belief.

The world needed a better training gun.

**From that one thought came a host of Smart Firearms
technologically advanced training weapons designed
specifically to make shooters, law enforcement,
and our military safer, yet more proficient.**

You only get one chance to be right.

**We are here to help by providing
you the best training tools so you can make it home.**

Be quick, be safe, and be right!

A close-up, low-angle shot of a red and black training handgun. The gun is the central focus, with its barrel pointing towards the upper right. The background is dark, with some blurred lights in the upper left corner, suggesting an indoor training environment.

The Evolution of Training

SMART FIREARMS promotes EFFECTIVE training.

Our training devices are designed to reinforce safe weapons handling by using a patented unintentional discharge zone sensor in the trigger well. An alarm will alert the instructor to an intrusion in the trigger guard when the student is not actively engaged in discharging the weapon and encourages self correction.

**Reduces training scars
and unintentional discharges**
