

**More Dogs Ride in a Ruff Land™  
Than Any Other Performance Kennel!**

**Ruff Land™**  
PERFORMANCE KENNELS

**ToughOne™**  
One-piece roto-molded construction

## **ToughOne™ One-Piece Roto-Molded Construction**

RuffLand™ kennels feature one-piece roto-molded construction from UV-stabilized polyethylene. This means no assembly and no bolt-through ledge (as on two-piece kennels) which saves up to 3 inches of side space. It also makes for a much stronger kennel. And, because there are no seams, it is also much easier to clean. Finally, a RuffLand™ kennel won't crack even in extreme subzero weather.

2

# Built tough, like a performance cooler!

**RuffLand™**  
PERFORMANCE KENNELS

### **Stronger**

One-piece design means no assembly, much more strength.

### **No Ledge**

No bolt-through ledge saves up to 3 inches of side space.

### **Easier to Clean**

No seams (and removable doors) for easier cleaning.

3

# Built safe, like a performance race car!

## Race Car-Inspired Ruff-Flex™ Energy Dissipation Technology

It's an unfortunate fact that too many dogs are injured or killed every year in vehicle accidents. The truth is, traditional dog kennels are simply not designed to protect their four-legged passengers. Ruff Land™ kennels feature race car-inspired Ruff-Flex™ Energy Dissipation Technology, a series of design elements that dramatically improve the odds of your dog surviving an accident.

### Here's how it works:

Most kennels are simply not strong enough to protect your dog in an impact situation. Ruff Land's one-piece roto-molded construction is extremely strong.

The walls, top and floor on Ruff Land™ Kennels also have built-in flexibility which absorbs energy that would otherwise be transferred to your dog. This is where the "stiff", two-walled plastic kennels, which claim to be safer, fail. They may not break, but when your dog hits the side of the kennel, there is no give like there is with a Ruff Land™.

The raised floor in a Ruff Land™ also serves to provide both strength and cushion as does the designed-in body crease around the middle of the kennel.

Likewise, the composite doors on a Ruff Land™ kennel are remarkably strong and designed to absorb energy. Plus, they feature six locking lugs where other kennels have no more than four.

Then there are the all-important heavy-duty tie-downs which you should always use. If your kennel is connected to your truck it can take advantage of your truck absorbing impact energy. But only if the tie downs are designed properly. Ruff Land™ tie downs are designed like the driver retention devices on a race car.

**Rick Noble, former NASCAR Safety Official says,**

*"There is nothing more important to NASCAR than driver safety. A key attribute to all safety efforts is building flexibility into the race car to absorb and dissipate energy. RuffLand employs these same proven energy absorbing principles into their kennels, unlike other kennel brands that claim safety. If you want a kennel that is built for safety, buy a RuffLand."*

# Built smart, with features that matter

**RuffLand™**  
PERFORMANCE KENNELS

## SureVent™ Tapered Wall Design

The sidewalls feature a series of vent holes which ensure proper air circulation for your dog. Plus, the sides are tapered so the vent holes will never get plugged, even if you slide the kennel up against a wall or some other flat sided object.

## UpSide™ Raised Floor Interior

The interior floor in a Ruff Land™ kennel is raised so that debris and liquids fall or spill off to the side and are channeled away from your dog. This UpSide™ raised floor design also creates some flex for a built-in cushioning effect for your dog as it rides in your truck.

## StackRight™ Design

The tops and bottoms of Ruff Land™ kennels all feature form-fit nesting that allows the kennels to fit together, making them stackable.

## Add-On Handles

Ruff Land™ kennels are pre-fitted with threaded inserts to accommodate custom handles (optional).

## Tie Down Attachments

Take advantage of your truck's absorbing impact energy with Ruff Land's properly designed, heavy-duty tie-downs (optional). Working load – 800 lbs.

**Slant-Back™**

**Slantback™ Suv-Friendly Design (Optional) Saves Space By Fitting Snugly Up Against The Seat In An SUV**

Select Ruff Land™ kennels feature a SlantBack™ design, an angled back end that fits perfectly up against the canted second seat on most SUVs.

## STACKABLE AND CONNECTIBLE

# Built for you, with your door system of choice

## Full-Bore™ Double Door Design

The door system on RuffLand™ kennels can be configured to your liking with doors on both ends or on one end and either side. Our handy side doors allow you to put the kennel lengthwise on a back seat and still give you an available access door without having to remove the kennel from your truck, SUV or car.

Side door in back seat

## All RuffLand™ Kennel Doors Are Unique In Six Ways:

1. They are constructed of an ultra-tough glass-filled composite.

2-Way  
DOOR™

NO BITE  
GRID PATTERN  
DESIGN

Rattle-  
FREE

2. They're ambidextrous and can swing either way.

3. They feature a no-bite grid pattern that precludes dogs from chewing.

4. They will not rattle (if you've owned other kennels you know just how annoying this can be).

5. They feature an easy-to-operate latch with a durable, secure latch cover (unlike other kennels where the latch cover can fall off causing the latch mechanism to fall apart).

6. Will resist rusting.

# ACCESSORIES

Available for X-Large, Large/Intermediate and Medium/Mid-Size kennels

## Replacement Doors

- The same great ultra-tough glass-filled composite doors that come standard on Ruff Land™ Kennels

COMPDR-XL2015  
COMPDR-INT/LG2016  
COMPDR-MED/MID2010

## Metal Door Liners

- Attach to inside of kennel door to eliminate scratching damage, pushing
- For use on airlines that require metal doors
- Hardware included

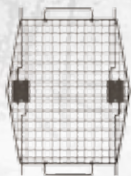

MDL-XL2016  
MDL-INT2014  
MDL-MED/MID2014

## Door Covers

- Attach to inside of kennel door to eliminate visibility, wind and elements
- Hardware included

DC-MED/MID2010  
DC-INT/LG2010  
DC-XL2016

## Replacement Wire Doors

- For those who prefer wire doors
- Available for all kennel sizes

WIREDR-SM2011  
WIREDR-MED2016  
WIREDR-INT/LG2016  
WIREDR-XLG2011

## Side Latch Rod Kit

- Replacement rods for the latch system on Ruff Land™ Kennels
- Available for Mid-Size, Medium, Intermediate/ Large or X-Large Ruff Land™ Kennels

SLR-MED/MID2013  
SLR-INT/LG2013  
SLR-XL2013

## Easy Squeeze™ Latches (for Ruff Land™ and other kennels)

- Premium latch is easier to squeeze as it requires less finger spread and strength. Ideal for those wearing gloves, with small fingers or arthritis
- Connects to/fits any kennel brand with 3/16" dia. rod

Set of 4 EZSQZ42015

## Coupler Kit

- Allows you to connect (side-by-side) two like-sized Ruff Land™ Kennels (see image to left)
- Available for Medium/Intermediate, Large or X-Large Ruff Land™ Kennels (pre-molded inserts)

CK-MED/INT2009  
CK-LG2010  
CK-XL2014

## Kennel Side™ Gun Holder

- Kennel Side attaches to the side of Intermediate or Large Ruff Land™ Kennels
- Firearm sets in place with ease and stays put until it's time to go afield

## Kennel Handles (2)

- Add handles to your X-Large, Large or Intermediate Ruff Land™ Kennel to make transport even easier!
- Easily attach into pre-molded inserts on top of kennel
- Hardware included

HK2009

## D-Ring Tie Down Kit

TDD2016

- Allows you to tie down your kennel in the back of your truck from all four corners
- Four D-rings, washers and bolts which fit pre-molded inserts in kennel
- Fit all Ruff Land™ Kennels

## Bracket Tie Down Kit

TD2009

TDXL2009

- Allows you to tie down your kennel in the back of your truck
- Flat design works when stacking kennels or with top tray
- Four brackets, washers and bolts which fit into pre-molded inserts
- Fit all Ruff Land™ Kennels

## Water Hole™

*It's a water jug and water dish in one!*

The Water Hole™ is a water container that holds up to one gallon of water that is stored in the tower side of the container yet is always available for your dog to drink. It works via a vacuum like an office water cooler. Simply fill it and as your dog drinks the water, that water is automatically replaced from the tower. Will not crack or break if water freezes. Durable roto-molded construction. Handy drain cap also makes it easy to rinse out.

WD2009  
WD2017-TAN  
WD2017-OR

Available in:  
Whitestone  
Rockstone (Tan)  
Orange Speckled

## Ruff Land™ Durable Dog Bowl

The perfect tip resistant, dishwasher-safe (top rack) dog bowl. Made of durable, food-grade polypropylene.

Small (4 cups) and Medium (10 cups) sizes

Available in:  
Whitestone  
Orange Speckled

DBSM2017  
DBMED2017  
DBSM2017-OR  
DBMED2017-OR

## Easy Rider™ Top Tray

*Sets on top of your Ruff Land™ Kennel*

The Easy Rider™ Top Tray is designed to contain your dog gear, shotgun shells, bagged birds, etc. on top of your Ruff Land™ Kennel. It won't slide off the kennel because it's recessed base nests onto the protrusion on the kennel top. Or, it can be bolted down (with optional hardware). And, it's extremely easy to clean! Fits Ruff Land™ Kennels from Intermediate through X-Large (excluding Intermediate SUV). Sits flush on Intermediate. Durable roto-molded construction.

TT2009  
TT2009-TAN  
TT2009-OR

## Water Topper™

*Store 9 gallons of water on top of your Ruff Land™ Kennel*

The Water Topper™ holds 9 gallons of water between its dual walls and lots of gear in the tub above. Fits Ruff Land™ Kennels from Intermediate through X-Large (excluding Intermediate SUV). Sits flush on Intermediate. Durable roto-molded construction.

WT2009  
WT2009-TAN  
WT2009-OR

## SitAround™ Trainer's Bucket

The SitAround™ Trainer's Bucket allows you to keep and carry all of your gear (plus water) in a back-packable bucket that doubles as a field seat.

The SitAround™ bucket fits into an insulated pack fitted with padded backpack straps and back pad for carrying comfort. SitAround™ also has a cushioned lid that serves as a seat which quietly spins around.

## Filletmaker™ Portable Fish Cleaning Board

*It's a fish cleaning system that will improve your fish cleaning experience*

The Filletmaker™ was designed to eliminate all of the hassles of cleaning fish. The portable roto-molded device drains away fish slime, gives you a place for fillets and fish carcasses and features a raised cleaning surface that gives your knife or electric knife ample clearance. And clean-up couldn't be easier!

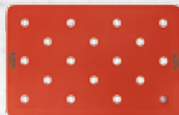

Two sizes:  
Master Filletmaker  
and Junior Filletmaker

Available in : Whitestone

FPF-VBP3B-SGB

MSTRFILLET2016  
JRFILLET2016

## Cushy Ride™ Kennel Pad

*28" x 18" x 3/4"*

This lightweight, soft, thick kennel pad is extremely shock-absorbing, totally waterproof, wonderfully

odor resistant and very easy to clean! Fits flush in Intermediate kennel but still works in larger kennels. Can be trimmed to fit smaller kennels.

KNLPAD2016

Available in:  
Whitestone

## Cackle Box™

*The best way yet to transport live pheasants and other game birds*

The Cackle Box™ is a roto-molded transport container for pheasants and other game birds. It features a clever one-way door system that makes it easy to put birds in but won't let them get out – until you are ready to take them out (just turn box upside down so door falls away). Cackle Box™ is well ventilated and the best way yet to transport birds.

Four models

BRDBX7SM2016  
BRDBX7LG2016  
BRDBX9L2017  
BRDBX9DBL2018

## RuffLand™ Ventilation Fans

*Hanging Bracket (7") hangs onto top of kennel door*

7"HNGBRCKTFAN

- Fits Mid-Size, Medium, Intermediate and Large Ruff Land™ Kennels
- Also fits some other kennel brands (with flat top doors)
- Comes standard with 8 ft. accessory 12v auto power cord

*Turtle Plate (7") mounts to kennel via pre-molded inserts*

7"TRTLPLTFAN

- Fits Intermediate, Large or XL Ruff Land™ Kennels
- Comes standard with 8 ft. accessory 12v auto power cord

## Power Cords for Fans

CIGPC2015

- 8 ft. accessory 12v auto power cord

CIGDBLPC2017

- 8 ft. accessory 12v "double" auto power cord

7PINPCTRL2015

- Round 7-pin power cord with trailer connector
