Heritage Introduces the Barkeep™ Revolver

Heritage Manufacturing, Inc., producers of classic-style single-action revolvers, is pleased to announce the newest member of the family—the Barkeep.

This pint-sized revolver has an Old West flair and was inspired by the 19th Century Colt “Storekeeper” model. The single-action Barkeep comes chambered and ships with the affordable .22 LR 6-shot rimfire cylinder and two-inch or three-inch barrel. This revolver is also compatible and designed to work with an interchangeable .22 WMR 6-shot cylinder option.

Built for optimal concealability in a light and portable package, the Barkeep boasts fixed open sights for fast action and a clean sight picture. Several grip options deliver classic western styling to compliment the standard black oxide or case-hardened frame finish. With a two-inch or three-inch barrel configuration, this compact carry revolver also includes a stylish ejector pin with a turned wood handle with an “H” logo on top to give it the full days of yore feel. The Barkeep checks all the boxes for form and function.
