## CARINTHIA

At Carinthia, we have been pursuing a common goal every day for decades: the permanent, innovative and performance-oriented further development of insulated clothing and equipment - from professionals for professionals.

As a global market leader, service orientation, entrepreneurial spirit and innovative strength are the focus of our activities.

The highest quality standards apply, because our products are 100% manufactured in Europe. Professionalism and flexibility in the field of product development enable us to develop solutions that provide more comfort and safety. Our products are tested by professionals and further developed together.

An important key to the company's success is the unique premium synthetic fiber insulation G-LOFT®. Warm, light and breathable - even in extremely wet and cold weather. Unrivaled USP is the extraordinary warmth-to-weight ratio of this high-tech fiber. The uniqueness of G-LOFT® acts as the basis of our product portfolio.

**PREMIUM  
INSULATION  
TECHNOLOGY**

**Made in Europe**

Warm, light and breathable - even in extremely wet and cold weather: The revolutionary G-LOFT® insulation meets the highest standards. Due to the "MEMORY EFFECT" the fibres automatically return to their original and unique form, providing warmth, even after repeated washing and hard use. G-LOFT® guarantees optimal thermal insulation and heat regulation, both indoors and outdoors.

## TECHNOLOGY

### BI-COMPONENT FIBER

**MEMORY EFFECT:** The exceptionally fluffy and warming spiral form of the G-LOFT® insulation is achieved through the molecular structure of the bi-component-fiber.

### SPECIAL FIBER BLEND

Microfibres and „Low-Melt-Fibres“ guarantee a permanent, fluffy G-LOFT® insulation with the minimum possible packsize.

### NATURAL CLUSTERING

Similar to high-end down, G-LOFT® products form „Clusters“. Air is trapped in countless small pockets and ensures an optimal insulation.

## BENEFITS

### WARM & LIGHT

Maximum heat rating at a minimum weight: G-LOFT® is measurably perceptibly lighter and has measurably higher heat rating/thermal efficiency for the same weight.

### TOP WET CONDITION PERFORMANCE

In contrast to down G-LOFT® fibers absorb no moisture. This guarantees a high thermal rating/thermal efficiency even in wet conditions.

### HIGHLY COMPRESSIBLE

The miraculously small pack/weight ratio: When packed, air escapes from the G-LOFT® insulation, which later quickly unfolds again due to the MEMORY EFFECT.

### HIGHLY BREATHABLE

The breathable G-LOFT® products guarantee a perfect temperature regulation outdoors and an optimal sleeping climate.

# NEW G-LOFT® ULTRA SHIRT 2.0

Consistent further development of the Carinthia Baselayer. With integrated XXL wrist warmers and additional Pocket in the back area. A wider zipper, easy stowability and of course the top workmanship characterize the Ultra Shirt 2.0. Warm pants with 40 grams of G-LOFT® filling. Flexible waistband with slotted button closure. The combination with Techno-Stretch material ensures an optimal fit and unrestricted mobility. The most important and largest muscle groups are effectively warmed and protected from the cold. Very good vapor permeability and good fit. Small pack size for quick compression in the integrated storage compartment.

## G-LOFT® ULTRA SHIRT & PANTS 2.0

NEW

- Quilted collar with G-LOFT® filling
- Stretch inserts in the back area for optimum freedom of movement
- Additional ventilation mesh inserts in the armpit area
- Close-fitting cut
- Wrist warmer with integrated thumb hole
- Slit pocket on the left at the back
- Can be stowed away using the integrated pack sack solution (left inside)

- Elastic waistband
- Elastic stretch thermofleece inserts in the entire leg area (optimal comfort)
- Stowable with the integrated pack sack solution (right inside)

**Insulation:** G-LOFT® 40g, 100% polyester | **Outer fabric:** 100% polyamide | **Inner lining:** 100% polyamide | **Arms:** Techno-Stretch, 92% polyester, 8% elasthan  
**Sizes:** S-XXL | **Colors:** black, olive | **Weight Shirt (g):** 320 (size M) | **Weight Pants (g):** 230 (size M)

The Carinthia ISO Mapping® technology was first used in the TLG series. By combining the advantages of two different G-LOFT® insulations, the jacket is given a performance-oriented warmth-to-weight ratio (also for the transition period). The integration of techno-stretch (torso and forearm area) ensures optimal freedom of movement. An ideal body climate and good ventilation is achieved through mesh inserts in the forearm area.

OPTIMIZED THERMAL PERFORMANCE  
PRECISION GUARANTEED.

The new and innovative **Carinthia ISO Mapping® Technology** helps the body build up heat where it is necessary. This is achieved by zoning the body regions. Each region of the body has a different heat radiation behavior. Carinthia ISO Mapping® builds on exactly that and divides the body into different heat zones.

**INSULATION**  
**WHERE YOU NEED IT**

G-LOFT® TLG LADY JACKET & VEST  
TECHNICAL LIGHT GARMENT

+15°C

The women's model has additional thermo-stretch inserts in the torso and back area as well as an adapted women's cut to ensure a perfect fit.

- 1 Napoleon pocket
- 2 large side pockets
- Hood with reinforced peak and elastic drawstrings
- Inner, one-hand adjustable / elastic drawstring at hem
- Techno-stretch
- Mesh inserts (ventilation)

**Insulation:** G-LOFT® 40g, G-LOFT® 30g, 100% polyester | **Outer- & Inner fabric:** 100% polyamide | **Arms-torso:** Techno-Stretch, 92% polyester, 8% elasthan; mesh 75% polyamide, 25% elasthan | **Sizes:** XS-XXL | **Color:** black | **Weight Jacket (g):** 270 (size M) | **Weight Vest (g):** 180 (size M)

The **Ultra Hoodie** was developed to meet the tactical and technical requirements. He is characterized by his Material mix of proven techno-stretch (sleeves / torso) and robust, yet stretchable upper material. A full-length kangaroo pocket offers storage space and is easily and quickly accessible. Magnetic buttons reliably close the kangaroo pockets and allow quick access. Two side zippers, which also have a Magnetic loop on the waistband ensure optimal ventilation and make the hoodie efficient and easy to use in professional areas. The hood is tight and impresses with its optimal fit. For the first time, 20 g of G-LOFT® are used - an absolute novelty.

The **Windbreaker Set** was developed according to military requirements. The technical Cordura® outer material is very robust and wind resistant. The cut of the lightweight jacket is extended at the back in order to better protect the sensitive parts of the body against the elements. There is no hood and the short stand-up collar has an integrated chin guard. The jacket can be compressed to a very small pack size and is therefore ideal as a backup solution in the backpack. It has 2 side pockets with zippers, one inside pocket and one patch pocket on the left upper arm.

The light windbreaker trousers are designed as practical overtrousers. Easy on and off is greatly simplified by the waist-high zipper. An integrated belt and the optional attachment of suspenders are further features of the pants. Abrasion-resistant, windproof outer material. The leg width is easily adjustable with a Velcro fastener. Pre-shaped knees and the effective and very light insulation make it easy to carry and professional use.

## TACTICAL PONCHO

+5°C

NEW

# NEW TACTICAL PONCHO

This multifunctional poncho combines several uses: Whether as a classic poncho, practical blanket or sleeping bag alternative. The 60g G-LOFT® filling ensures effective cold insulation and climate regulation. The Carinthia multifunctional poncho can be transformed into a sleeping bag in a few simple steps, is classically used as a blanket / poncho liner, or as a classic protection against cold and wind. A practical fastening option with a buckle, an integrated pack sack and a small insulated kangaroo pocket complete the multifunctional poncho. The hood, like the multifunctional poncho itself, can be stowed in a pack sack and, thanks to its compact size, always with you on tour.

- Reversing function: olive / multicam
- Side press studs (sleeve opening)
- Integrated pack sack
- Stowable hood

- Hip belt with buckle
- 2-way zipper
- Hood adjustable with a cord
- Insulated kangaroo pocket (olive)

**Insulation:** G-LOFT® 60g, 100% polyester | **Outer fabric:** 100% polyamide | **Inner lining:** 100% polyamide | **Size:** one size | **Colors:** olive, Multicam | **Pack size (cm):** 28x23 | **Weight (g):** 860

**Sizes:** S-XXL | **Weight (g):** 520 (olive), 500 (Multicam)

## PRG 2.0 JACKET

PROFESSIONAL RAIN GARMENT

AVAILABLE COLORS

The **PRG** series was designed for wet and cold conditions. It combines waterproof and windproof protection with comfort and durability. The robust GORE-TEX® outer material is so breathable so that it can be worn comfortably even during activity.

- Helmet compatible hood
- Double adjustable with reinforced screen
- Hood and hem adjustable via outside pocket
- Water-repellent outer zips
- 2-way 6mm front zip with wind flap and chin guard
- 2 large outside pockets
- Mesh inner pocket with zip
- Underarm ventilation
- 2 upper arm pockets with Velcro
- Anatomically pre-shaped sleeves (adjustable in width by Velcro fastener)
- Internal, one-hand adjustable, elastic drawstring on the hem
- Including pack sack

**Outer fabric:** 100% polyamide, waterproof, windproof, breathable | **Membrane:** Bi-component based on ePTFE | **Sizes:** S-XXL | **Colors:** olive, black | **Weight (g):** 580

## PRG 2.0 TROUSERS

AVAILABLE COLORS

- Elevated cut
- Integrated holsters
- Small slit pocket on the right hip area
- 3D pockets
- Hip belt
- Pre-shaped knees
- Reinforced inner leg area
- Adjustable leg cuffs (Velcro)
- Including pack sack

**Outer fabric:** 100% polyamide, waterproof, windproof, breathable | **Membrane:** Bi-component based on ePTFE | **Sizes:** S-XXL | **Colors:** olive, black | **Weight (g):** 560

Small, light and versatile. Thanks to the small pack size, the Survival Rain Suit can be easily stowed away and is therefore an indispensable companion for everyone who has to take every gram of equipment into account. The jacket and trousers are of course waterproof and windproof. The breathable GORE-TEX® outer membrane provides the necessary moisture transport.

## SURVIVAL RAIN SUIT

- Waterproof, windproof, breathable and light
- Height adjustable hood
- Higher stand-up collar
- Sleeve hem with flap & Velcro for width adjustment
- Elastic drawstring to adjust hem width

- Waterproof, windproof, breathable and light
- Adjustable, elastic drawstring in the waist area
- Waistband with flap and Velcro for width adjustment

**Outer fabric:** 100% polyamide, waterproof, windproof, breathable | **Membrane:** Bi-Component based on ePTFE | **Size:** one size | **Color:** olive | **Weight Jacket (g):** 265 | **Weight Trousers (g):** 200

# G 40 LINER

SUMMER SLEEPING BAG

The G40 Liner is the lightest and most minimalistic sleeping bag from Carinthia. Small pack size (approx. 1.5l) when packed in the integrated pack sack with a weight of approx. 480g. Ideal as a hut sleeping bag, but also suitable as an inlay for warmer sleeping bags.

- Integrated pack sack
- Access opening on the top right for fine adjustment
- 2-way zip
- Hood drawstring for additional adjustment

**Insulation:** G-LOFT®, 100% polyester | **Outer fabric:** 100% polyamide | **Inner lining:** 100% polyamide | **Sizes:** uni size | **Outer dimensions (cm):** 220/77/48 | **Weight (g):** 480

# G 90

SUMMER SLEEPING BAG

The G90 with 90g / m<sup>2</sup> G-LOFT® insulation and a comfort limit of 5,7 °C proves to be the ideal summer sleeping bag. The use of water-repellent Shelltex Ultra Pro outer material as well as the highly breathable and light Shelltex Superlight Pro inner fabric enables an incredibly small pack size and a very low weight of 620g. The antibacterial properties of G-LOFT® provide hygienic impulses for the first time.

- Differential cut
- Zipper cover flap
- Combinable
- Anti-snap tape
- 2-way zipper
- Prefabricated loops for Carinthia Grizzly & Polycotton Liner (additional heat output)
- Pack sack included

**Insulation:** G-LOFT®, 100% polyester | **Outer fabric:** 100% polyamide | **Inner fabric:** 100% polyamide | **Sizes:** M, L | **Outer dimensions (cm):** 215/78/52 (M), 230/83/55 (L) | **Weight (g):** 620 (M), 650 (L) | **Pack size compressed (cm):** 14x18 (M), 14x20 (L)

The **G145** with 75g / m<sup>2</sup> G-LOFT® insulation and a comfort limit of 0.9 °C already scratches at the freezing point and weighs only 890g. Due to the almost seamless outer shell and the water-repellent shelltex Ultra Pro material, morning dew and other sources of moisture have no influence on the heat output. The Shelltex Superlight Pro inner fabric ensures an incredibly small pack size and a very low weight of 890g. The antibacterial properties of G-LOFT® provide hygienic impulses for the first time.

The **G180** is particularly characterized by the use of a high-performance outer and inner fabrics. The sleeping bag has tremendous breathability and an ultra-light weight. The first antibacterial G-LOFT® is processed and sets new hygiene standards. The implementation of CARINTHIA ISO-Mapping® Technology in the G-LOFT® sleeping bag series is groundbreaking. For example, the G180 contains an additional insulation layer, in the area where increased heat loss can occur. In addition, 50 g of G-LOFT® protect the body area extremely efficiently without applying unnecessary weight. As a result, the RCT value could be significantly improved.

**SPECIAL PRODUCTS**

The G-LOFT® **Technical Sleeping Bag System** opens a completely new CARINTHIA product line. The TSS is a sleeping bag combination system consisting of the TSS Inner and the TSS Outer sleeping bag. The application possibilities of the TSS are as varied as the features of this system. On the one hand, the highly breathable outer and inner fabric ensures ideal moisture transport to the outside, on the other hand, both sleeping bags can be used individually or in combination. With the TSS you really have a high-end summer or three-season sleeping bag. By combining the two sleeping bags a Temp. Limit M of -15 ° C is achieved. The TSS meets the high standards of any survival adventurer, even in more extreme conditions.

## DISCOVER | DRY INSULATION SYSTEM

During a normal night, a person releases up to 500g of sweat in the form of water vapor. This moisture - should it remain in the insulation layer of the sleeping bag - leads to a drastic decrease in the insulation performance. At very low temperatures, the dew point (the temperature at which water vapor becomes liquid) is usually on the inside of the outer shell. In extreme cold, this condensation can even freeze to ice, which means that the filling cannot dry in the long term and the sleeping bag becomes heavier and wetter. This leads to a drastic drop in the insulation performance of the down sleeping bag.

This system uses a second inverted outer shell made of water-repellent and breathable Shellproof Ultra. With a corresponding zip opening, this layer can simply be turned outwards to dry. Ice crystals or drops of water that have formed between the layers can be easily shaken off. In order to dry the remaining condensation moisture more quickly, the inner sleeping bag cover is made of down-proof but extremely breathable Shelltex Ultra.

The additional air layer between the outer shells increases the heat storage capacity and thus achieves a sensational warmth-to-weight ratio.

# SURVIVAL ONE

HIGH PERFORMANCE WINTER SLEEPING BAG

-8,8°C  
COM F LIMIT

-18,0°C  
COM LIMIT

-40,0°C  
EXTREME

This high performance winter sleeping bag was especially designed for military use. It has generous draft tubes on the inside of the zipper to prevent any heat loss there. Anti-snap tap along the zipper and a protection flap on the outside keep out wind and wetness. The survival one has differential cut which means that each successive insulating layer is cut more generously. This ensures the greatest possible loft in all areas and in every sleeping position. Movement inside the sleeping bag creates pressure points but with our differential cut only the innermost layer is compressed. By opening the zipper at the bottom you can tie up the foot end so that you can walk and even wear the bag like a coat. The sleeves are stored between the insulation layers.

BIVY BAGS

The **Observer Plus** is a one-man bivouac with two poles without pegs and plenty of luggage space inside. Thanks to GORE-TEX® Arid Lite Air technology, a unique three-layer laminate, the Observer Plus is completely waterproof and extremely breathable. The front side opening with mosquito net allows views to the outside.

## OBSERVER PLUS

### WHAT MAKES GORE-TEX® ARID LITE AIR SO SPECIAL?

All our bivouac bags are equipped with a high quality 3 layer laminate of GORE-TEX®. GORE-TEX® Arid Lite Air is not only absolutely watertight, windproof and moisture permeable, it is also extremely breathable and – most importantly – gas permeable. This means, that our bivouac bags and tents can be completely sealed, without having to leave an air-vent open. Oxygen and Carbon Dioxide exchange through the material, even though you are fully protected from bad weather.

3 layer GORE-TEX® laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA 6.6 | **Length (cm):** 240 | **Shoulder width (cm):** 104 | **Foot end section width (cm):** 75 | **Pack size (cm):** 35x12 | **Weight (g):** 1.750

## XP TWO PLUS

## COMBAT

The **XP II Plus** is a bivouac with a pole arch that keeps the face area clear. Thanks to GORE-TEX® Arid Lite Air technology (a unique three-layer laminate) it is absolutely waterproof and extremely breathable. Loops on the underside allow the integration of a sleeping mat for additional comfort and protection against the cold.

The **Combat** is a classic bivy bag with minimal pack size and weight. It is mainly used for mountaineering or as part of a survival package. The PU-coated bottom ensures 100% waterproofness. The outer shell consists of a waterproof and windproof laminate, which is also breathable.

3 Layer GORE-TEX® laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA 6.6 | **Length (cm):** 250 | **Shoulder width (cm):** 104  
**Foot end section width (cm):** 76 | **Pack size (cm):** 35x10 | **Weight (g):** 1.185

3 Layer GORE-TEX® laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA 6.6 | **Length (cm):** 250 | **Shoulder width (cm):** 95  
**Foot end section width (cm):** 53 | **Pack size (cm):** 32x8 | **Weight (g):** 700

# MICRO TENT PLUS

A one-man tunnel tent for special unit personnel. Two all-round zippers allow a middle part to be opened. The zippers are made waterproof by specially designed storm flaps. The integral mosquito net can be closed separately. Five loops on the back hold the insulating mat in place.

3 Layer GORE-TEX® Laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based Membrane | **Bottom fabric:** 100% PA 6.6 | **Dimensions (cm):** 270/75/75  
**Pack size (cm):** 35x12 | **Weight (g):** 1.800

## EXPEDITION COVER GORE

The Expedition-Cover Gore is a classic bivy bag - absolutely waterproof and breathable. But with one difference: With the zip-in-zip system you can zip your sleeping bag into the bivy bag. Getting in and out is just as comfortable as with a sleeping bag without a cover.

3 Layer GORE-TEX® Laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based Membrane | **Bottom fabric:** 100% PA 6.6 | **Length (cm):** 230 | **Foot section (cm):** 90  
**Pack size (cm):** 32x10 | **Weight (g):** 600

## SLEEPING BAG COVER

Used by the German Army. The practical centre zipper is made waterproof by a double, specially designed storm flap. Generous mummy cut.

3 Layer GORE-TEX® Laminate | **Outer fabric:** 100% PA 6.6 | **Functional layer:** ePTFE based Membrane | **Bottom fabric:** 100% PA 6.6 | **Dimensions (cm):** 245/100/72  
**Pack size (cm):** 35x8 | **Weight (g):** 1.000
