

## Press Release

Title: Introducing The Covenant Stag 15 Rifle in 6 mm ARC  
November 17<sup>th</sup>, 2021  
Cheyenne, WY

Introducing a new caliber rifle from Stag Arms: The Covenant Stag 15 in 6 mm ARC. The 6 mm Advanced Rifle Cartridge (ARC) was derived from another popular round, the 6.5 mm Grendel, yet with some key changes made. With the design being commissioned for the Department of Defense, this round was designed to strike the balance between a lighter ammunition weight and key ballistic performance. The perfect middle ground between .308 caliber and 5.56 mm, the ARC gives you the biggest bang for your buck. Looking for a hunting round, but don't want to lug .308 out into the field? The 6 mm ARC is for you. Looking for something with better ballistics than 5.56? The 6 mm ARC is for you. With better ballistics than 5.56, less recoil than .308 while still hitting with almost as much power — The Covenant Stag 15 in 6 mm ARC is designed to be your overall new go-to.

Ever a champion of left-handed shooters, Stag Arms is proud to support the #LeftyMafia by offering The Covenant Stag 15 in 6 mm ARC in both right-handed and left-handed configurations. It is also available in three rifle lengths: the 16-inch model, equipped with a midlength gas system and MOE fixed rifle stock; and the 18- and 20-inch options furnished with a full-length gas system and PRS Stock — so you've got plenty of options to choose from. All rifles come with bead-blasted 416R stainless barrels in a 1/7 twist rate and VG6 Gamma 65 muzzle devices, to provide reliability under any condition. If you find yourself not quite satisfied with your 5.56's capabilities, but also find the weight of .308 to be too big for your purposes, check out the 6 mm ARC in The Covenant Stag 15.
