#### **Polymer80 To Unveil Exciting New Products at 2022 SHOT Show**

**DAYTON, Nev. (Jan. 14, 2022)** — Polymer80 will be unveiling several new products at this year's SHOT Show, to be held January 18-21 at the Venetian Expo Center and Caesar's Forum in Las Vegas, NV. You can find P80 in booth #10030 on the upper level of the Venetian Expo Center.

"Our company proudly designs and develops innovative firearms and after-market accessories that provide ways for our customers to participate in the firearms build process," said Loran Kelley, Polymer80's founder and CEO. "We're very excited about our new product lineup, as well as what we see as a year of big growth for Polymer80."

Some of the innovative products you will be able to see at the show include:

\* PFC9 Optic Cut & PFS9 Optic Cut: Being introduced at SHOT and now available with a RMR Optic Cut, the PFC9™ and PFS9™ Complete Pistols combine innovative ergonomics and features to provide the ultimate in shoot-ability and comfortable concealment. Built with high-strength reinforced polymer construction, the P80® Pistol Frames include our aggressive standard texture on the sides, front and backstrap for a supreme grip in multiple environments. Our complete slide features front and rear serrations coupled with clean, modern lines and a heavy front chamfer which allows effective manipulation and holstering of a P80® pistol while maintaining a low-key aesthetic profile.

\* AFT Kit: Launched in November and available now, the Polymer80® AFT™ "Assemble For Thyself™" Kit contains all the necessary components to build a complete P80® handgun. Based on P80's Next-Gen ergonomics and aesthetic design, the AFT™ Kit is the perfect project for DIY gun builders and hobbyists or for anyone wanting to learn how to properly assemble a striker-fired pistol. Choose from two unique models: PFC9™ Compact or PFS9™ Full Size in black or FDE. This is a disassembled firearm and will require the end user to install the pistol parts kit prior to function checking and range testing.

\* The PFC9™ and PFS9™ Complete Pistols: Launched in 2021, these pistols combine innovative ergonomics and features to provide the ultimate in shoot-ability and comfortable

concealment. Built with high-strength reinforced polymer construction, the P80® Pistol Frames include our aggressive standard texture on the sides, front and backstrap for a supreme grip in multiple environments. Our complete slide features front and rear serrations coupled with clean, modern lines and a heavy front chamfer which allows effective manipulation and holstering of a P80® pistol while maintaining a low-key aesthetic profile.

\* PF320: Get your first look at the exciting new PF320, Polymer80's first polymer grip designed for compatibility with SIG SAUER® components for P320™. Designed and manufactured in the USA, the PF320 production pistol boasts P80's unique front and rear slide serrations, optic cut slide, a brushed stainless-steel barrel, Warren Tactical Fiber Optic Front Sight and anodized aluminum magwell. The frame is made with P80's proprietary blend of high-strength reinforced polymer and features next generation ergonomics. It's scheduled to ship in the third quarter, but with high demand expected, placing an early order now is an excellent idea.
