

Global Ordnance Announces New Arex Delta Gen.2 Tactical

Sarasota, FL—Global Ordnance, the exclusive importer of Arex Defense firearms in the United States, is bringing new Tactical Models of the concealed-carry-favorite Arex Delta Gen.2 handguns in 2022. The Delta Gen.2 Tactical models will be available in the M and the X, a compact and a compact with a full size grip, respectively.

The Tactical Models are chambered 9x19mm and are suppressor-ready, featuring a 1/2x28 threaded barrel with thread protector and suppressor-height sights. Additionally, an extended ambidextrous magazine release is included as well as three interchangeable backstraps and two magazines, one standard and one extended. The modularity and customization of the Delta Gen.2 is designed to be the perfect handgun for any concealed carrier, competitor, or operator.

The Delta Gen.2 Tactical is Optics Ready and includes 5 different mounting plates with screws to install your favorite micro red dot. The new Tactical Models will be available in Standard Black, Flat Dark Earth, Gun Smoke Grey, and Olive Drab Green. If you choose a color and change your mind, all of the internal parts and slides are interchangeable with any of the Gen.2 frames (available separately soon), another unique facet of the Gen.2 design.
