

## Design and Utility Patents Awarded to Precision Plus Partner M & M Machinery Services

---

ELKHORN, WI – Precision Plus, a manufacturer of precision machined components, is proud to announce the awarding of both design and utility patents to our business partner, M & M Machinery Services, from the United States Patent Office. M & M, a long-time partner of Precision Plus, patented a quick-change vent tube system for high-speed bottle filling equipment for the beverage industry.

Precision Plus and M & M Machinery have been business partners since 2010, manufacturing aftermarket replacement parts for soft drink and beer filling machines. In 2015, M & M approached Precision Plus for assistance in bringing their design for quick change vent tubes to fruition. In 2016, Precision Plus manufactured this design into prototype form, which were tested successfully in a soft drink production facility in California.

Precision Plus and M & M worked together to bring this new product innovation to the market. With patents recently awarded, this product is currently in use in several soft drink, beer, and water production facilities in the United States. Precision Plus congratulates and celebrates the long journey with our partners at M & M in this achievement, and we look forward to many more years of continued success.

### **About Precision Plus**

Precision Plus provides precision machined solutions for small parts across aerospace, dental, medical, and more industries. The company's phenomenal culture of passionate people and commitment to ongoing investments in technology results in timely responses, quality products, and on-time delivery. Through collaborative engagement/early supplier involvement (ESI) with our clients, our Application Engineering team can help develop the most cost-effective solutions to deliver ultimate performance and value. With support from our knowledgeable Production team, our professional Client Services group provides timely responses and delivers quality products on time and at a fair price. Precision Plus offers inventory management programs for our clients, whereby our team monitors inventory levels and finished components are shipped as needed.
