

Special Steel Profiles for slides

steel profile

dimension tolerance

IT 9 according to ISO 286 depending on nominal dimension. In consultation with ZOLLERN tighter tolerances are possible.

material

Structural steel, case hardening steel, alloyed/non-alloyed heat-treatable steel, free-cutting steel, tool steel, stainless steel, wear resisting steel and others and materials on request.

surface configurations

hot rolled, cold rolled, cold drawn, phosphate treated, shot blasted or brushed connection on request.

terms of delivery

In manufacturing and fixed lengths up to 12000 mm. Cross sections from 5 mm² to 7650 mm².

machining and treatment

Heat treatment, induction hardening, mechanical processing to install components with surface treatment like galvanizing
