KICK-EEZ® Showcases New Magpul Recoil Pads at SHOT Show 2023's New Product Center
KICK-EEZ® releases three new pads specifically designed for Magpul stocks that are USA-made with proprietary material.

LEXINGTON – KICK-EEZ® Will continue their ongoing displays at SHOT show in January 2023 at booth #42118. The USA-based company is known for their top-of-the-line shotgun recoil pads. Focused on always putting the customer first, they design their products to not only enhance the individuals shooting experience but also their performance by reducing recoil up to 94%.

The new series of Magpul recoil pads opens the company up to a brand-new market, the rifle industry. Designed with a grip texture, each of the three pads has a snug fit, adding another layer for quality performance. The collection consists of the KICK-EEZ® Magpul SGA/Hunter Stock Recoil Pad, the KICK-EEZ® Magpul Carbine Stock Recoil Pad, and the KICK-EEZ® KZ-TAC1 Recoil Pad for Magpul PRS stocks as well as a great option for other stock manufacturers. Each pad has a rugged, tactical design that allows for the pad to truly grip into the shoulder.

“We design products with the end consumer in mind. Whether you are a competition shooter, or a hobbyist, we want your shooting experience to be top-notch and for your personal performance to increase. It’s exciting to be able to expand our product line to the rifle industry. As a USA-based company, we look forward to working with a whole new group of shooters, from beginners to experienced. We want individuals to enjoy the sport and to pass their love of it onto others, and that begins with a positive shooting experience and our pads 100% help with that.”, says RJ Yozwiak, KICK-EEZ® Managing Partner.

KICK-EEZ® will be exhibiting at SHOT Show 2023 in Las Vegas, January 17 – 20th, 2023 at booth #42118. The KICK-EEZ® Magpul pads will be on display in the SHOT Show New Product Center at Caesars Forum.

About KICK-EEZ®:

KICK-EEZ® is a Kentucky-based company that sells a wide selection of rifle recoil pads and shooting supplies made of Sorbothane®, which provides shock absorption and reduces recoil effectively and quickly. Less recoil reduces flinching, easing sore shoulders and cheeks and eliminates it in all shooting conditions. From shoulder to fingers, KICK-EEZ® has something to help reduce flinching and ease soreness as well as help to adjust your “line of sight.” KICK-EEZ® Products are manufactured in the U.S. For more information, please visit [KICKEEZproducts.com](https://www.KICKEEZproducts.com).
