

Copper Plated Flat Point Bullets

9 mm. 115 gr.

Product Description:

Our process starts with a lead billet that is extruded into wire. The lead wire is then swaged into a core. The cores are copper plated, then restruck once more. Though not common in the industry, this restruck process produces a bullet that is more uniform, with a more precise diameter and a smoother finish for a better shooting and better looking bullet.

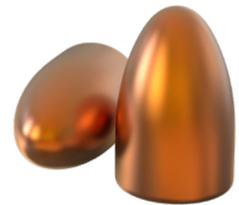

Technical Specifications:

Type	Weight	Material of Jacket
FMJ	7.50 g. 115 grs.	CuZn 30

Copper Plated Round Nose Bullets

9 mm. 115 gr.

Product Description:

Our process starts with a lead billet that is extruded into wire. The lead wire is then swaged into a core. The cores are copper plated, then restruck once more. Though not common in the industry, this restruck process produces a bullet that is more uniform, with a more precise diameter and a smoother finish for a better shooting and better looking bullet.

Technical Specifications:

Type	Weight	Material of Jacket
Plated	7.50 g. 115 grs.	CuZn 30

CENTER:
Mustafa Kemal District Dumlupınar Boulevard
METU Teknokent Informatics Innovation Center
280/g no: 1260 Çankaya / Ankara

FACTORY:
Saray Mah. 3. Cad. No:68 K.Kazan / Ankara

Who we are?

Alfa Defense Industry was established in 2014. Since its establishment, it has successfully completed national and international engineering projects by using its high experience in engineering disciplines.

Our aim is to provide high quality production in a short time and with optimized costs.

Our company has been continuing its services with its professionalism and experience since the day it was founded. Working in discipline in all projects, the Alfa Defense Team uses the latest technology and developments and provides defense industry services by engaging in joint R&D and activities with various organizations.

Our goal is to create high quality innovative products in the defense industry. In this context, our company has started the production process of bullets and cases within the scope of priority investment planning for 2020.

Within the scope of future investment and R&D planning, efforts to design and produce products of different diameters and calibers continue.

Full Metal Jacket Round Nose Bullets

9 mm. 115 Grs.

Product Description:

Full metal jacketed bullets are the best choice for training and target shooting applications. In addition, our products provide high efficiency and accuracy standards in all security and military operations.

Technical Specifications:

Type	Weight	Material of Jacket
FMJ	7.50 g. 115 grs.	CuZn 30

Copper Plated Round Nose Bullets

9 mm. 124 Grs.

Product Description:

Full metal jacketed bullets are the best choice for training and target shooting applications. In addition, our products provide high efficiency and accuracy standards in all security and military operations.

Technical Specifications:

Type	Weight	Material of Jacket
FMJ	7.50 g. 115 grs.	CuZn 30

Lead Core

9 mm.

Product Description:

Lead Cores are used in manufacturing plated bullets. All the cores have identical shape and weight. They are easily collated by the feeders of the bullet presses due to their symmetrical shape.

Technical Specifications:

Type	Weight	Material of Jacket
-	-	-

Global Slug

12 Cal.

Product Description:

12 Cal. Hunting Slug are produced entirely by Alfa Defense on our own, with the same quality standard homogeneous and smooth shape in every single piece. Specially designed for the big hunts, due to the air channels on its sides, achieves the target quickly and effectively, has an aerodynamic design. Our 12 Cal slugs especially designed for the ribbed rifle accurately hits the target and leads to instant lethal effect.

Full Metal Jacket Round Nose Bullets

9 mm. 124 Grs.

Product Description:

Our process starts with a lead billet that is extruded into wire. The lead wire is then swaged into a core. The cores are copper plated, then restruck once more. Though not common in the industry, this restruck process produces a bullet that is more uniform, with a more precise diameter and a smoother finish for a better shooting and better looking bullet.

Technical Specifications:

Type	Weight	Material of Jacket
FMJ	8.00 g. 124 grs.	CuZn 30

Copper Plated Flat Point Bullets

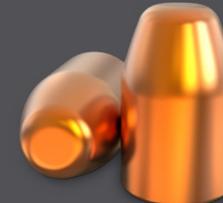

9 mm. 124 Grs.

Product Description:

Our process starts with a lead billet that is extruded into wire. The lead wire is then swaged into a core. The cores are copper plated, then restruck once more. Though not common in the industry, this restruck process produces a bullet that is more uniform, with a more precise diameter and a smoother finish for a better shooting and better looking bullet.

Technical Specifications:

Type	Weight	Material of Jacket
FMJ	8.00 g. 124 grs.	CuZn 30

Lead Core For FMJ

9 mm. 115 Grs.

Product Description:

They are used in manufacturing FMJ bullets. All the cores have identical shape and weight. They are easily collated by the feeders of the bullet presses due to their symmetrical shape.

Technical Specifications:

Type	Weight	Material of Jacket
-	-	-

Buckshot

Technical Specifications:

Buckshot	Buckshot	Buckshot
Size: 4,25mm	Size: 4,50mm	Size: 5,00mm
Size: 5,25mm	Size: 5,50mm	Size: 6,40mm
Size: 6,80mm	Size: 7,40mm	Size: 8,00mm
Size: 8,43mm	Size: 8,60mm
