

News Release from PrOlix® Lubricants:

July 1, 2019

PrOlix® Products Get a NEW LOOK!

PrOlix®/ProChemCo, LLC launched a new Bio-Tech product line to clean, preserve and lubricate in 1995, the first pioneers of a successful “all in one” gun care product, now deemed “Bio-Technology”. Our recyclable (strain and reuse) products are made of 89 percent or greater renewable resources, a true “commitment to sustainable practices and caring for the environment!”

The USDA lists PrOlix® as a BioPreferred Product since 2012. PrOlix® removes Carbon, Copper, Lead, Shotgun plastic residues, and Black Powder. PrOlix® will not damage wood, freeze, or flash off; so many practical uses, you must try it yourself and see how it can amaze you on them all.

To complement the PrOlix® Cleaner/Lubricant (DRY TECH) line, use the equally superior “gun-oil and grease replacer” PrOlix® Xtra-T™ LUBE for a total care product for your needs!

PrOlix® announced at the 2019 Shot Show that they would be shipping out their products with a New look around mid-year 2019! Along with the NEW LOOK, due to many requests, our favorite size PrOlix® TGCP in the 16oz-PRO with an adjustable nozzle and Trigger-Sprayer Cap will also change to an easier to handle bottle! Look for us in your favorite media, publication, or check our website!
