Magne-Tech Launches Rigel II-M, A Magnetic Light Kit for M-Lok Rails

The Rigel II-M light kit includes a powerful, lightweight rechargeable flashlight with a patent-pending magnetic, directional, coupling system and multiple lighting mode groups.

Farr West, Utah - (Jan 1, 2023) A reliable light that can quickly be attached to a rifle can be a lifesaver for gun/homeowners that hear a bump-in-the-night. Rigel II-M, launching today, is a weapon light kit that magnetically attaches and detaches a powerful flashlight, with directional accuracy, to any standard M-Lok rail. Rigel II (1100 lumen magnetic flashlight) can also be augmented with a magnetic belt clip for everyday carry, or several other options depending on its application.

People who use a flashlight on their rifles but also want to enjoy using it elsewhere will appreciate the versatility and rugged design of the Rigel II.

Rigel II-M is a convenient, lightweight, and powerful weapon light kit that fits standard M-Lok rails and can be programmed with multiple lighting mode groups to fit any use scenario. With its optional accessories, Rigel II is an ideal companion for other outdoor adventures like hiking, camping, fishing and ATV'ing. The powerful, lightweight flashlight comes with a rechargeable 18650 Li-ion battery with an integrated micro-usb port for easy charging and charge indicator. The flashlight can also be used for working on home projects or used in other low-light environments.

The patent-pending magnetic coupling system allows people to easily attach and detach Rigel II from wherever it's being used with the ease of powerful neodymium magnets. Thanks to Magne-Tech's patent-pending magnetic coupling system, Rigel II-M maintains directional accuracy, so the flashlight returns to the same direction every time it's attached to its complementary mount (i.e. self-zeroing).

"We're excited about the development of this lighting kit that can benefit sport shooting enthusiasts, homeowners, and hunters, as well as ATV and dirt bike riders to avid hikers and campers," said Joel Jacobson, creator of Rigel II-M and founder of Magne-Tech. "This has the potential to not only help keep gun/homeowners safe but it can even be used around the house or at the campsite."
