

FOR IMMEDIATE RELEASE:

Gun Barrel Drilling and Reaming on One Machine

MARSHALL, Mo. – January 1, 2023 – The DeHoff G560-DR2 performs both gundrilling and reaming operations on gun barrels. After first gundrilling the barrels, a quick tooling changeover allows a pull-reaming operation to be performed using the same machine. The twin-spindle machine has a barrel capacity of 17 to 50 caliber and a slide travel of 60 inches (1524 mm).

The G560-DR2 is part of a turnkey package of gun barrel manufacturing equipment offered by DeHoff, including machines for gundrilling, pull-reaming, button rifling, cut rifling, as well as tooling, stress relief ovens, lathes, and gauging equipment. DeHoff machines are built-to-order by Kays Engineering in their Marshall, Missouri facility. To learn more please visit <https://www.kays-dehoff.com/products/dehoff/gun-barrel/>.
