Warrior Systems Manufacturing Inc. unveils new lineup of rifles

ONTARIO, California – Warrior Systems Manufacturing Inc. is proud to announce the release of the WSM15 Series, precision built MSRs designed for the most discerning shooters. Each rifle is machined, built, and tested in-house at Warrior's US based state-of-the-art facility.

The first of many to come, the WSM15 series of rifles feature billet machined upper and lower receivers with a match grade fit and finish. The mid-length gas system has been tuned for optimal reliability and performance. The WSM proprietary designed muzzle brake mitigates felt recoil for quicker follow-up shots, and the Nitride finished bolt carrier group allows for a smooth and reliable operating system. Each rifle is Cerakote finished with color options of Armor Black, Tungsten Grey, Midnight Bronze, and Flat Dark Earth.

Warrior Systems also offers California and Massachusetts Compliant models.

Warrior Systems rifles are designed and manufactured by Americans for Americans. For more information visit www.warriorsystemsusa.com.
