Gun Industry Marketplace, Press Release: *AR-Style Forward Charging System now available for 9mm PCC!*

Introducing the new Bilson Arms BA-9FC Forward Charging Pistol Caliber Carbine

August 08, 2023: Bilson Arms, LLC, full-service machine shop specializing in custom AR designs, uppers and lowers, and inventors of the patented BA-Pivotal Buttstock, introduce their new BA-9FC AR-Pistol Caliber Carbine, (PCC), with a Patent-Pending forward charging system allowing the shooter to charge, recharge, and clear the cartridge from the chamber while keeping the weapon shouldered.

Bilson Arms BA-9FC Forward Charging PCC

The newly released BA-9FC is Bilson Arms' signature statement to the AR Platform. With a Patent-Pending forward charging system, the shooter charges the pump-style action once, and now the rifle will be semi-automatic just like any other AR-style system. You are not required to move the weapon from your shoulder or divert your focus from the target.

- Patent-Pending Forward Charging System
- Pistol Caliber Carbine (PCC)
- Caliber: 9mm
