*The KET Catcher stop flying brass and saves hours of cleanup time.*

- ✓ **Soldier safety** - Keeps ejected casings under control, and away from soldiers' neck or face
- ✓ **Fire prevention** - Prohibits hot casings from working into the Humvee battery compartment
- ✓ **Time savings** - Saves *hours* of time cleaning up spent brass in the elements
- ✓ **High capacity without jams** - Catches 400 rounds and works with or without assault pack
- ✓ **Unobstructed ejection port** - View and access with ease for immediate-action
- ✓ **Designed for M249** - Fully integrates with ground vehicle and helicopter machine gun mounts
- ✓ **Durable construction** - Made in USA of 1000D CORDURA® fabric; reduced IR signature on request
- ✓ **Simple setup** - No extra tools required, case doubles as dump bag

*~Volume Pricing Available~*

Kinetic Energy Tools is the original designer and patent holder for the K.E.T. Brass Deflector as well as the new military-grade K.E.T. Brass Catchers.

We are registered and approved with the DOD;  
CAGE: 9FCK7
