

INTRODUCING OUR NEWEST MAGNET PISTOL REFLEX SIGHTS | DS-RDS-G1-M

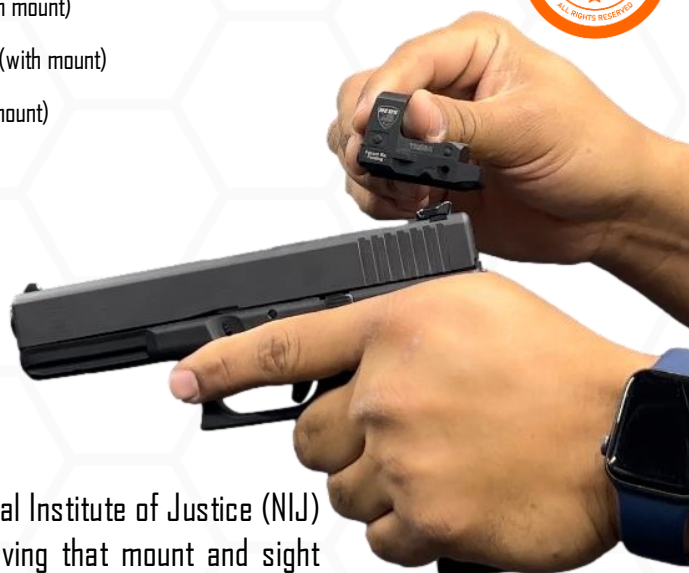

This advanced sighting solution combines unparalleled precision with a unique patent pending MAGNETIC mounting system that ensures effortless attachment with no MOS or slide modifications.

Say goodbye to MOS or complicated installations (Gunsmith) and hello to a smooth, tool-free setup that stays securely in place, even during rapid-fire action due to this state-of-the-art high-power, easy-to-attach MAGNET mount.

The mounting system invented and patented by  uses a high-power Magnet, that is now being produced in USA by HEDS..

Windows Lens Size	17x24mm / 0.7x0.9in
Length	40.6mm / 1.6in (Sight) - 50mm / 1.97in (with mount)
Width	25.4mm / 1.0in (sight) - 29mm / 1.14 (with mount)
Height	24.3mm / 0.96in (sight) - 30.2mm / 1.19 (with mount)
Weight (net)	19g / 0.67pz (sight) - 51g / 1.79oz (with mount)
Reticles	3MOA Dot, Circle (40MOA), Circle with Dot
Dot Intensity	8 levels & 2 NV
Dot type	Red, green & multi reticle red
Compatible	R.M.S. footprint
Battery Type	CR2032
Battery Runtime	50,000 hours for weakest dot

Mount & sight tested at  an accredited National Institute of Justice (NIJ) lab. Results complied and exceeded testing protocol proving that mount and sight remained at zero after multiple shots & strength test pulls of 50lbs..

Certifications apply to our quality management system, not to our products
