Warne® Scope Mounts Introduces New Lightweight Bipod: The Skyline® Lite

TUALATIN, OR—(January 15, 2024) Warne Scope Mounts, a leading innovator in the world of shooting accessories, proudly announces the release of their latest product—the Skyline Lite bipod. Engineered for the next level of strength and versatility, this bipod is a rugged and adaptable platform suitable for any shooting endeavor.

The modular bipod is available in ARCA, quick-detach, and fixed picatinny head orientations and features 44° of total cant range, a cant tension lever, and one-handed adjustability. Additional highlights include a quick-deploy feature from horizontal with three additional locking leg positions at 0°, 45°, and 90°. The legs include 13 height increments offering a total height range from 6.5" to 11.15".

"The design and materials chosen for the Skyline Lite Bipod represent a meticulous process aimed at achieving the perfect balance of strength and lightweight performance," says Victor Ianciu, Director of Operations at Warne.

Precision machined from aircraft-grade aluminum and finished with a durable hardcoat anodize, the Skyline Lite bipod is crafted to endure the most challenging environments without sacrificing its lightweight design. Designed and manufactured in the USA, it embodies the perfect blend of durability and precision.

Background: In 2018, Warne released the original Skyline Precision bipod, a product that gained widespread acclaim for its patented design and rugged construction. Building upon its success, the Skyline Lite Bipod now offers a feature-rich experience at an accessible price point.
