

January 6, 2024

(Middletown, PA) Meprolight® launches the Mepro M22 at SHOT Show. It is the next generation of the legendary Mepro M21 Reflex Sight — used by the Israeli Defense Force and law enforcement agencies worldwide.

**Smaller and more compact, the Mepro M22 reflex sight utilizes fiber-optic illumination by day and Meprolight® tritium by night that will perform in any lighting condition without batteries, ever.** It's battle-proven construction meets or exceeds rigorous standards to reliably function in the harshest conditions.

The Mepro M22 utilizes ambient light when available during daylight and a proprietary tritium light source system ensuring bright reticle visibility in low light and night time conditions. Transition between the two systems is instantaneous and automatic.

Rugged and reliable in extreme weather conditions as well as the rigors of combat, the Mepro M22 is suitable to use with NODs and magnifiers. Tritium luminance is warranted for ten (10) years.

## FEATURES

- 100% self-illuminating aiming solution. No batteries needed
- Reticle illumination is auto-adjusted based on ambient light levels
- Available with a 3.5/40 MOA Bullseye or 10 MOA Triangle reticle
- Compatible with NODs and magnifiers
- Compact, lightweight ergonomic design
- 10 Year warranty on tritium illuminance
