## Experience Wave Relay® Technology at SHOT Show 2024

Get hands-on with Tactical Networking Technology. Operate a Remote Weapons Station and control Spot from Boston Dynamics at the Persistent booth.

**NEW YORK, New York—January 9, 2024—**Persistent Systems (“Persistent”), a leader in mobile ad hoc (MANET) technology, announced today that the company will be exhibiting its networking and communications solutions at the SHOT Show, held at The Venetian Convention & Expo Center, in Las Vegas, Nevada, on January 23-26, 2024.

“There has been tremendous interest from Military, Law Enforcement, and the Civilian Outdoor user community in Wave Relay® networking technology,” said Brian McDonald, Senior VP of Field Technical Services & Support. “At Shot Show we are offering an immersive experience, where attendees can put on the kit and operate the technology.”

Geared up, attendees will then experience Wave Relay® across several tactical activities at the booth.

The first stop is the Sentry portable unmanned weapons system from Onyx Industries. Attendees can take control of the remote weapons station over the network from the Rugged Display and Controller (RDC) on their kit and view the live feed from its optics.

From there, attendees can launch the Boston Dynamics app on their RDC and take control of Spot – the robotic quadruped. Use the robot’s arm to open a door and pick up a suspected IED.

“Everyone wants to drive Spot! But by the end of the experience users will realize the power of a fully networked operational environment. Every unmanned system and remotely operated weapon is accessible to ALL of the end-users. It’s a total game changer,” Brian McDonald added.

Persistent will also be raffling off items to booth attendees every day throughout the show. Prizes include a Forward Observations Group X Wolf Forty Designs SEAF Jr. knife, a Stroup Bravo 5 knife, a Spiritus Systems Fanny SACK Pouch Mk3, and a Spiritus Systems plate carrier.

“There will be a lot of activities for attendees to experience at the booth. Control weapons stations, drive unmanned vehicles, control cameras. I don’t want to reveal it all here, you’ll need to stop by,” added Brian McDonald.

To experience the Wave Relay® network, visit the Persistent Systems booth (No. 44155) on Level 1 of The Venetian Convention & Expo Center. For further details on how to participate in the daily raffles or to explore Persistent Systems’ cutting-edge solutions, be sure to follow the @waverelay Instagram account.

## **About Persistent Systems, LLC**

*Headquartered in New York City since 2007, Persistent Systems, LLC is a global communications technology company that develops and manufactures a patented and secure Mobile Ad hoc Networking (MANET) system: Wave Relay®. Wave Relay® transmits and receives data, video, voice, and other applications under the most difficult conditions. Their suite of products is utilized in Commercial, Military, Government, Industrial, Robotics, and Unmanned Systems markets.*
