Powerhold Inc. set to represent Pibomulti S.A. in North America

Le Locle, Switzerland — April 1, 2025 – Pibomulti, an innovative leader in the field of tailor-made machining solutions, is pleased to announce the signing of a strategic partnership with Powerhold, a major industry player in the United States. This partnership will make Powerhold the official representative of Pibomulti in the U.S., further strengthening the brand's presence in this key market.

This new partnership marks a significant milestone in Pibomulti's international development strategy, which aims to enhance its influence through strong distribution channels and establish trusted relationships with reliable, competent local players. With its recognized expertise in the machining and machine tool sector, PowerHold will bring an in-depth understanding of the U.S. market and an extensive distribution network to effectively promote Pibomulti's products and services.

This partnership highlights Pibomulti's commitment to innovation and continuous growth in the global market. Together, Pibomulti and PowerHold plan a series of initiatives designed to strengthen the product offering, support customers, and create solutions tailored to the specific needs of American consumers.

About Pibomulti:

Pibomulti is a Swiss family-owned company founded in 1979 in Le Locle, located in the canton of Neuchâtel, the heart of the watchmaking and micromechanics industry. The company specializes in the design and production of high-precision machining heads to meet the demands of industrial production. The product range includes high-end Angular Heads, Multispindle Heads, Spindle Speeders, and Turret Heads, all of which ensure productivity and reliability.

Pibomulti also designs and manufactures custom machining heads to meet specific production requirements.

About PowerHold:

PowerHold, founded in 1958, is a long-established supplier of workholding products to the machine tool industry, helping customers process their parts efficiently and accurately. In addition to producing standard and special devices, PowerHold has a long history of partnering with key manufacturers to complement their offering to customers. Partnering with Pibomulti is a logical step to strengthen the solutions PowerHold can offer its clients.

Powerhold will manage new application sales of the Pibomulti product range. Additionally, Powerhold's trained staff will provide domestic repair and rebuild services of Pibomulti's line of precision machining heads as well as tailor-made specific products.
