RRP: \$ **199.00**

632 CB-1 is our first knife featuring a crossbar mechanism, designed with the goal of further enriching our range of available products.

For this new model, we developed a drop point blade in MagnaCut steel with a sportive and futuristic design, enhanced with 4 different opening options: thumb stud, thumb hole, cross bar and flipper, to further facilitate ambidextrous deployment.

The stonewashed finish pairs perfectly with the available handle options in Micarta and G10.

The distinctive handle design, developed to achieve the perfect balance between grip and ergonomics, along with the reversible clip, makes the CB-1 a cutting-edge, modern folding knife, engineered for safe use in any situation
