

Since launching the first Triggercam at HuntEx in 2019, this revolutionary product has created such an interest worldwide that it is hard to imagine what the manufacturers could improve in such a short of time.

Santie Corbetta

Eyecam Technologies decided to introduce Triggercam 2.1 to the market earlier than anticipated and started the R&D process during 2020 to be ready for the 2021 hunting season.

Renowned as an effective, fast-moving and highly innovative company, they have become the market leader, adding a fourth product to their range and producing it during Covid conditions at a much more affordable price than its competitors, and outperforming its rivals.

Did we forget to mention – **Proudly South African!**

The Triggercam 2.1 was designed for sport and tactical shooters, continually striving to improve accuracy and consistency. However, it is also intended for the hunter, who wishes to capture that precious moment between himself and the trophy. The new model boasts 4K video resolution and a x4 times faster frame rate per second in full HD resolution.

Engineered and designed, aligned with customers' needs, to withstand the most unforgiving outdoor conditions, the Triggercam 2.1 is purpose-built and compatible with 95% of riflescopes on the market. This revolutionary accessory provides you with the benefit of peering through your scope while recording the shot without compromising the quality of your optics.

WiFi connectivity allows for camera setting adjustment and immediate download of video content to your mobile device to review shot placement and accuracy.

The unit comes with 8 sleeves, an SD card, and a C-type USB cable, and is neatly packaged.

The Triggercam 2.1 weighs 453 grams. The use of a sleeve ensures that it fits securely and firmly on your riflescope.

It is very easy to fit and install, with the app being available on both iStore and Play Store. The Triggercam app ensures that the focus of the unit to your specific riflescope is effortless and easy.

What differentiates the 2.1 model from version 1 is that multiple devices can link to this latest model. This means that more than one person can look on his/her own mobile device at the shooter's view through the riflescope. This is a valuable addition, especially for trainers who always need to "see" what the shooter sees. With this function, however, the trainer can rectify any error immediately in real time.

The app also acts as a remote to the Triggercam, allowing remote video recording and capture of still images, all controlled via the app functions.

You still have the on-board recording function on the unit (an improvement from version 1), the LED indicators are brighter, the sound louder, and it has different pitches to indicate “record” and “stop-record”.

Special built-in functions preserve battery life, giving this model an edge. Functions include auto-off, sleep mode, and a quick-record function that allows start and record with the press of a single button.

This brings me to the video options. For the YouTuber in each of us, these options are superb.

| Resolution | 4K 30 fps |
|---|--|
| | 1080 P 120 fps/ 60 fps/30 fps |
| | 720 P 240 fps/120 fps |
| High-definition, slow-motion video replay | 4 x (1080 P 100/120 fps) / 8 x (720 P 200/240 fps) |

Why would you want a Triggercam 2.1?

Simply to own the best of its kind on the market! Seriously, this is a must-have accessory for training. From instructors putting first-time rifle owners through their paces to advanced competitive shooters, the video feedback and analyses you will be able to review will definitely be to your advantage and may just give you that competitive edge you need.

Other than that, true to the Triggercam “RELIVE THE MOMENT” tag line, it will provide you with everlasting, vivid memories of first hunts and exhilarating hunting moments.

Specifications

| Aircraft-grade aluminium and proprietary anti-shock materials | Military-grade design, engineered to withstand recoil force and unforgiving outdoor conditions |
|---|--|
| Dimensions L x W x H | 100 mm x 50 mm x 93.2 mm |
| Weight | 453 grams |
| Riflescope eyepiece compatibility | 32 mm – 48 mm |
| Smart phone app | Triggercam 2.1 app available on Android, IOS & Huawei operating systems. Live-streaming capability, video gallery, camera control, download and edit videos. |
| Memory | SD card up to 128G, Class U3 or above. |
| WiFi | Integrated WiFi with live-streaming function and instant downloading of videos |
| Quick record | Switches on power and record function for instant recording |
| Optics | Multi-coated optical lens for optimal performance. |
| Video stabilisation | Advanced video stabilisation technology assists in optimal quality videos, minimising recoil effects. Function can be switched ON/OFF |
| Waterproof | IP64 rating |
| Battery | Integrated lithium-ion battery with 2.5 hours recording time, and 10 hours standby time |
| High-definition, slow-motion video replay | 4 x (1080 P 100/120 fps) / 8 x (720 P 200/240 fps) |
| True sound microphone | Able to record high-quality sound, 360-degree true sound, able to switch on and off |
| Resolution | 4K 30 fps 1080 P 120 fps/60 fps/30 fps 720 P 240 fps/120 fps |
| USB | C-type USB, |
| HDMI | Micro HDMI for TV output |
| Video output | PAL/NTSC |
| Recording timing alarm | Off/3 min/5 min/10 min |
| Input voltage | 5V |
| Other features | Auto low-light function |

WHAT DO YOU GET

1 x Triggercam 2.1
1 x C-type USB cable
32GB micro SD card
1 x Quick-start guide 📖
