

Porcupine

Porcupine: The Ferocious Rocky Warrior

Introducing the Porcupine, a fierce and versatile folding knife that masterfully blends functionality, utility, durability, and style. This exceptional knife reflects our commitment to crafting the perfect EDC tool, shaped by your invaluable feedback and suggestions.

Robust Top Liner Lock and Sizeable Thumbhole

- The Top Liner Lock provides smooth, one-handed operation and a secure lock-up, keeping your fingers safe from the blade path during use.
- The nearly hidden lock bar is secured inside the handle with a stainless-steel plate and further reinforced by a solid steel backspacer.
- The Porcupine offers effortless one-handed opening and closing, thanks to its large thumbhole design.

Pointy Tip and Big Belly Blade

- The generous blade belly makes slicing tasks—such as cutting meat, fruits, and vegetables—an absolute breeze.
- The pointy tip delivers precision for tasks like opening packages, cutting ropes, and slicing through cardboard.

- The 2.99" 14C28N blade offers excellent edge retention, corrosion resistance, and ease of sharpening

Comfort Grip

- With a 1.22" wide handle, the Porcupine comfortably accommodates medium to large hands.
- Choose between G10 or Micarta handle materials to match your style and preference.
- The forward choil provides versatile grip options, while the dedicated handle choil prevents hand slippage during heavy use.
- The barrel lanyard tube enhances convenience for carrying, retrieving, and storing your knife while adding structural support to the handle.

Detailed Features

- **Jimbing** ensures maximum grip and control at all key touchpoints.
 - **A stabilizing pin** reinforces the handle, preventing deformation over time.
 - **All T8 screws** simplify maintenance, requiring just a single screwdriver.
 - **Internally milled liners** reduce weight while maintaining strength for EDC and hard use.
 - **The large thumbhole** allows smooth opening, even for users with large hands or gloves.
 - **The recessed button** minimizes accidental openings, enhancing overall safety.
-
