

## **FOR IMMEDIATE RELEASE**

### **Tricer Launches the RP: The Ultimate Hunting Bipod**

Cheyenne, WY – February 17, 2025

Tricer, known for engineering precision glassing and shooting support systems, is proud to announce the release of the Tricer-RP, the most versatile hunting bipod on the market. Built to eliminate the need for multiple bipods in different situations, the RP is a true all-in-one solution for hunters who demand adaptability and rock-solid stability in the field.

Whether you're shooting from a prone or sitting position, the Tricer-RP adapts seamlessly to any field environment, ensuring steady, consistent performance when it matters most. Designed around Tricer's "Fast. Light. Simple." philosophy, it gives hunters the ability to shoot confidently from any position—without compromise.

The RP includes both long and short carbon-fiber legs, spiked and rubber feet, and full Arca-Swiss and Picatinny compatibility. A swivel stud-to-Picatinny adapter is also included, fitting most stocks with traditional swivel studs. Together, these features give the RP unmatched flexibility for nearly any hunting scenario.

Bottom line: this is the last bipod you'll ever need.
