Flexographic & Digital Printing - Precision Die Cutting - High-Speed Gluing

At Morrisette Packaging, creativity meets capability.

Our brand new manufacturing capabilities are the first of their kind in North America, delivering exceptional quality and control that no other company can provide.

WHY WORK WITH US?

- From Design to Delivery[®] : Design → Print → Die Cut → Glue → Deliver.
- Right run, right press: High-volume efficiency on flexo; agile, photo-quality runs on digital.
- The most color-correct printing press in North America. Whether digital or flexo - we provide Pantone-accurate color management and repeatable results across campaigns and substrates.
- A dedicated team that collaborates, communicates, and keeps the project moving.
- Speed to shelf: Rapid proofs, quick changeovers, and short lead times to hit launch windows.
- Smarter cost control: Right-sized structures that cut DIM weight, damage, and total landed cost.
- Sustainable by design: Water-based inks and recyclable materials with responsible sourcing.

WE MANUFACTURE EXCELLENCE

E-COMMERCE & RETAIL-READY

- One or Two-Sided Printing Solutions
- Shelf-Ready Packaging (SRP) or Ship-in-Own-Container (SIOC)

DISPLAYS & POP/POS

- Counter, Floor or Pallet Displays
- Custom Solutions for Temporary or Semi-Permanent Applications
- Optional Kitting and/or Fulfillment

INDUSTRIAL APPLICATIONS

- Protective Packaging Solutions
- Die-Cut Custom Fillers for Block & Brace Void-Fill

First of its Kind Flexographic Printing

- Up to eight ink stations for full-color images and bold, consistent brand color.
- Crisp Linework and industry-leading, impactful graphics.
- Durable coatings and finishes for shelf or ship.

First of its Kind Digital Printing

- Four-Color-Process printing for campaigns, seasonal sets and versioned SKUs.
- Short to Medium economics with on-demand agility and variable data.
- Color accuracy and rapid iteration variations without the expense of printing plates.

First of its Kind Die Cutting

- Conventional (Rotary or Flat-Bed) and Digital Cutting options.
- Precision accuracy for hand-assembly or complex automation.
- CAD-prototypes for structural fit, form and function.

First of its Kind Gluing & Converting

- High-speed folding and gluing for straight-line, auto-bottom, four-corner, or specialty formats.
- Inline quality controls and visual inspection for square, strong and ship-ready results.

When We're the Best Fit

- You want to differentiate your brand in a crowded marketplace
- You manage multiple SKUs and channels (retail and ecommerce) and need color consistency
- You're balancing speed to market with cost and inventory risk.
- You're fighting DIM weight, damage, returns or inefficient co-packing.
- You want short-run agility without sacrificing the economics of long runs.

We Design Results

- Turn missed launch windows into fast changeovers and reliable schedules.
- Turn high MOQs & obsolescence into digital runs to match demand; print only what you need.
- Turn color drift across lots into tight color management and repeatable press control.
- Turn DIM weight & freight creep into right-sized structures that lower material spend and total cost.
- Turn transit damage into engineered protection and material-neutral solutions to reduce returns.
- Turn vendor sprawl & finger-pointing into one accountable partner From Design to Delivery®.

DISCOVER

We start by listening.
Not pitching.

DEFINE

Clarity before creativity.

THE Morrisette Method

OPTIMIZE

Because great
solutions evolve.

DESIGN

Creativity meets
capability.

BUILD

From sketch to solution.
